THE CALENDAR

FOR

1858.

INTRODUCTION.

NOTICE.—It must be premised that the time given in this Almanac is Bombay Mean Solar Time, or that which will be shown by a well-regulated Clock.

Sun-rise and Sun-set.—The time given in this Calendar shows the instant at which the centre of the visible Sun is on the visible horizon of Bombay. In calculating the effects of refraction and dip of the horizon, the Barometer has been assumed to be 29.8 in., the Thermometer 80° Fahr., and the height of the observer 15 feet above the level of the Sea.

Moon's Age.—The Time given in this Calendar is the Time elapsed since the Sun and Moon had the same longitude at Bombay.

Time of High Water.—It has been calculated from Tide Tables prepared at the Colaba Observatory, and printed in the Volume Part II. of 1847, containing Meteorological and other Miscellaneous Observations made at that place.

Eclipses.—During the year 1858, there will be two Eclipses of the Sun, and two of the Moon; but the Lunar Eclipses will only be visible at Bombay.

INTRODUCTION.

The only explanation which is conceived necessary to render the scheme of the following Calendar fully understood, is that the Christian months indicated at the top of each page divide the Native months as they appear represented in the space below allotted to their names. January, for example, partakes of the Hindoo months (Marroo) Maugh and Falgoon; (Guzerat, Duxun, and Concan) Poush and Maugh;—(Malabar) Dhanuh and Magaram;—the Parsee months (Shaenshoyee) Teer and Amoordad; (Kudmee) Amoordad and Sharaver; and the date of Nowroz 129 to 159;—the Mahomedan months Jummadee-ul-avul and Jummadee-ul-akhur;—and the Jewish months Tebbett and Sabbatt.

In the respective columns the 1st of January corresponds with the 2nd of Maugh Vud (Marroo), the Poush Vud (Guzerat, Duxun, and Concan); the 20th of Dhanuh (Malabar); the 9th of Teer (Shaenshoyee); the 9th of Amoordad (Kudmee); and the 129th day of Nowroz or Kudmee; the 15th of Jummadee-ul-avul (Mahomedan); and the 15th of Tebbett (Jewish), and so on throughout the year.

PARSEES.—There are at present two branches of the Parsees, who differ one month in the year from each other; those that are one month forward in their year are styled Kudmees, and the rest Shaenshoyees. The present scheme embraces the Parsee Era of Yezdezerd, commonly styled Kudmee or Dureayee Nowroz, or Sea-reckoning, the same being made use of in all nautical calculations among Asiatic mariners, the New Year of which always commences on the 1st of Furverdeen. The Kudmees reckon the New Year and the Dureayee Nowroz to fall on the 26th of August, one month earlier than the commencement of the Shaenshoyee's New Year. It also embraces the Parsee Era of Yezdezerd, commonly called Shaenshoyee, the New Year of which generally begins on the 1st day of Furvurdeen; the Shaenshoyees compute the New Year to commence from the 25th of September, a month later than the commencement of the Kudmee's New Year.

HINDOOS.—It may here be observed that the Hindoo Lunar months invariably consist of 30 Tithees, or Lunar days; and the whole month is divided into two equal parts of 15 Tithees each, the one called Shookla Puksh, or Shood, the bright half or increase of the Moon, the other the Krishna Puksh, or Vud, the dark half or decrease

of the Moon. The Lunar month begins, on the Western side of India and South of the Nurbudda river, with the first day of the Shookla Puksh (Shood Prutipuda), or bright half of the Moon. At Benares, Oojein, and the country North of the Nurbudda, the Lunar month begins with the first day of the Krishna Puksh (Vud Prutipuda), or dark half of the Moon. The first is designated the Shookladee mode of reckoning; and the latter the Krishnadee. The Lunar year begins with the first day of the Shookla Puksh, or bright half of the Moon in Chytr, both North and South of the Nurbudda, in every country in India; but as the dark half of the Moon preceeds the other, or Shookla Puksh at Benares, the half Lunar month of Chytr is taken from the last Lunar month of the year preceding, and considered to belong to it.

It has been already stated that the Lunar month invariably consists of 30 Tithees or Lunar days, but it has been customary with all Eastern nations, in order to regulate their Feasts and Festivals, to drop certain Lunar days, and to reckon others twice to make up the deficiency; the first of these are termed by Hindoos, Kshuyu Thithees (perishable days), and the days repeated twice are called Virdh Thithees, (additional days). The rule of these is exceedingly simple; those Lunar days on which the sun does not rise (Sooryoduyu nuheen) are struck out; those in which it rises twice are Virdh, or additional; and it is obvious that such circumstances will occur about six times in the course of the Lunar year.

MAHOMEDANS.—The first day of the Mohurrum, or the commencement of the year, is ordinarily reckoned from the first appearance of the Moon after the conjunction, observed from an eminence of any sort, or even in cloudy weather from the time at which, but for these obstacles, it would be visible; and this can scarcely happen earlier than 24, or later than 48 hours after the conjunction. After this manner each several month is reckoned, and the lapse of 12 such months constitutes the Mahomedan year.

JEWS.—The Jews have ever marked their time by *sevenths*, according to the command given by God himself, for labouring during only *six* days of each week, and resting on the seventh, which was consequently set apart, or consecrated, to the service of their Creator. They not only hallowed the seventh day, or SABBATH, which formed a portion of their *week of days*, but they had, also, their *week of years* which consisted of seven years, and their *jubbilees*, or rejoicing periods, which were celebrated by many acts of justice, forgiveness, and restitution, at the end of every *week of seven times seven years*. The Hebrews, the Assyrians, Egyptians, Arabians, and Persians, all had this custom of reckoning by weeks. The original computation by *sevenths* has been vehemently contested by some authors, who say that the four quarters or intervals of the Moon (the *phases* or changes of which are about seven days' distant) originally gave occasion to this mode of division. But it seems more reasonable to conclude, that it arose from the traditional account of the *first seven days* of the world's existence.

We have also endeavoured to discriminate the Feasts and Festivals of each nation by different sorts of type; the Hindoo, for example, we have distinguished by Roman small letters, as Poush Shood; the names of the Malabar and Jews' months by Roman capitals, as MAGARAM; the Parsees by small capitals, as AMOORDAD; and the Mahomedans by Italic small letters, as *Mohurrum*.

Native Festivals, Fasts, and Observances.

HINDOO.

MUCKER SUNKRANT.—On this day the sun enters the sign "*Mucker*," or Capricorn,—Vide 12th January. The Hindu festivals are so numerous, and the observances of them are so intricate, that they often bewilder a writer when he sits down to describe them. And it is equally difficult to point out which of the festivals is the greatest. The writer of the Hindu legends have set such enormous merit on the observances of each of them, as to surpass all human comprehension; and they have ever unhesitatingly said, that those observances themselves will obtain heaven. Great rejoicings are held among the Hindus, but particularly among the Brahmins, on account of the feast of *Muckur Sunkrant*, when the Sun reaches the most southern sign of the Zodiac, *Muckur* or Capricornus. From this day till the time of his leaving the most northern sign of the Zodiac, he is said to be in *Utarayan* and from the time of his leaving the Northern sign to the entering the sign "Kurk" or Cancer, he is said to be in *Dukshanayan*. The vernal and autumnal equinoxes divide the year into two equal parts. *Utarayan* and *Dukshanayan*. The days of *Utarayan*, are esteemed lucky, and those of the *Dukshanayan* unlucky. During the days of *Dukshanayan*, it is said that the gates of heaven are shut, and in the *Utarayan* they are open. For men to die in the *Utarayan* is considered more blessed, because they get immediate entrance into heaven; but if the righteous die in the *Dukshanayan*, they shall have to wait outside of the gates till the *Utarayan* sets in. In the days of *Utarayan*, Moonj—the ceremony of investing the youths with the sacred cord, and marriages are celebrated. The ceremonies that are solemnized at the day of *Muckur Sunkrant*, just at the time of the sun's entrance into the sign, are these.—The Hindus go to the sea, accompanied by a Brahmin priest, to bathe; there they rub their bodies with *tillas*,* and wash themselves in the manner prescribed in the Shastras. The Brahmin then repeats certain incantations suited to the occasion, and closes the ceremony by receiving due adoration, and a present of money for himself. On their return home they invite Brahmins, present them with a cup of bell-metal, filled with *tillas* and some money, according to the ability of the *Yezaman*. Some even present the Brahmins with copper pots, new *dhoturs*, umbrellas, &c., and the whole family receives benediction from them, which is done by the Brahmins repeating certain words, and throwing on their heads a few grains of red coloured rice. After the performance of this ceremony they go to take their meals, which consist of sweetmeats. They invite their friends and relations to dinner; and towards evening they wear new clothes, gold and other ornaments, and frequent the houses of their friends and relations, distributing *tillas* mixed with sugar. At the time of putting the *tillas* into the parties' hands they repeat these words: "Receive these *tillas* mixed with sugar, and be friendly with me throughout the whole year." All the praise and prayers that are offered this day are to the Sun, and to no other god. The second day of Sunkrant is named *Kur*, which is generally celebrated by women, by making small presents among those of their own sex.—Vide 12th January.

WUSUNT PUNCHAMEE seems to have been instituted in honour of the Spring, which season is personified under the name of *Wausanta*, who is fabled as attending on *Rama*, or the god of love.—Vide 20th January.

RUTH SUPTUMEE is dedicated to the worship of the Sun. This day is the beginning of the Munwuntura, or period embracing the reign of a *Munoo*, of which fourteen govern in succession, during the different ages of the world. The present age is under the dominion of the seventh Munoo; and at the commencement of this period a new sun is supposed to have mounted his chariot.—Vide 22nd January.

SHEVARATREE.—A fast day in honor of *Sheva*, during which the *Linga*, or Bachiophalus, is worshipped.—Vide 12th February. Vud Chuttoordassee, or the 29th of every month, is kept sacred by the votaries of Sheva; but *Magh vud* Chutoordassee, has obtained its peculiar *epithet Maha Sheva Ratree*, or the great night of Sheva. The Hindu legends account in the following manner for its notoriety among the rest of *Sheva Ratrees*:—In time immemorial an archer of wicked and licentious habits went into a forest this day, to shoot deer. He spent the whole day in the pursuit of his game, and, on a sudden, night came on, and he was left to the mercy of wild beasts. When he found himself in such a forlorn condition, he had recourse to a *Bale* or *Bilva* tree† to secure himself from their attack. Having got upon the tree,

* Tillas are said to be the favourite grain of the Sun.

† A favourite tree of Sheva's, and which is held sacred among the Hindoos.

by way of relaxation, or to get a clearer view, he broke off all the branches that hung around and above his head, and flung them down: fortunately the twigs which he threw fell on the *Linga* of Sheva, which was near the foot of the tree. Sheva was so much pleased and satisfied by the accidental worship of his votary, that he forthwith sent a *Veman*, or heavenly chariot, and took the hunter into *Kylas*, his own abode, with acclamations of joy. To commemorate this great event of the entrance of the archer into Kylas, the Hindus observe a fast this day, and worship Sheva in hopes of obtaining like merit. Observance of *Sheva Ratree*:—This day the votaries of Sheva fast, and in the night, repair to the temples of Sheva, accompanied by a Brahmin priest, who performs pooja by repeating certain incantations: first he pours some water over the *Linga*, and washes it, and afterwards he decorates it with choice flowers. When this is done, the priest takes his sacred book, wherein Sheva's thousand different names are written, and reads the names: and the Yajaman, the worshipper, flings a leaf of *Bale* over the head of the *Linga* each time. This kind of pooja is performed four different times during the night, and thus no sleep is obtained for the whole night. This is styled the pooja of the four *Praharas*, or watches. It commences at about eight P. M., and ends at five A. M. This night the pagodas of Sheva are thronged by devotees. Some persons engage twelve Brahmins, and others four, &c., to perform the pooja, according to the abilities of the Yazaman. The Brahmins must be liberally paid for their labours.

HOLEE (Sanscrit—HOLIKA OR PHALGUTSUVA).—This festival, called also *Doluvatra*, or the swinging festival, is supposed by Sir W. Jones to relate to the vernal equinox, and to be similar to the Persian Nowroz. It commences fifteen days before the full moon, on which the ceremonies are terminated, and is held in honour of *Kristna*. In the freedom with which the lower classes now behave towards their superiors, this festival resembles the Roman Saturnalia: and in the sending people on bootless errands, it corresponds with our 1st of April. Red powders are daubed upon the image of the god, and thrown and squirted by his worshippers on each other, while females are saluted by exclamations and jests of no very chaste description. The wheaten cake, which is placed on the pile lighted at the close of the festival, is called pollee, and the right of first offering it in a village is considered as an honorary privilege. Neither the origin of this festival, nor the manner in which it is observed, can be described. Nor is this manner of observing it confined to the lower classes of the native community—the highest apparently joining in it with the same zest as the lowest. This festival nominally continues from the new to the full moon; but only a few of the last days are practically and openly devoted to it. For two or three days no respectable women appear in the streets, so obscene and abusive is the language in almost every one's mouth, and applied to any women that they may happen to see. It is often called Shimga, from the name of the month in which it occurs.—Vide 27th February.

THE HINDOO NEW YEAR (Shalivan, called Goody Padwa).—On the morning of this day a Hindoo first rubs oil upon his body, and then bathes himself with warm water. A pole bearing a flag, and surmounted with a brass or copper vessel, is erected in front of the house. One such pole must be erected by each family. This represents the banner of Indra, the king of the gods, which on this day is also raised in honour of him by the gods. What is done here on earth is therefore in imitation of what takes place in the heaven of Indra. The leaves of the bitter nimb tree are then to be eaten, which secures health to the body, because this tree is the offspring of the Ambrosia of the gods. The Almanack for the New Year is then to be worshipped, and its predictions, in regard to the year just commencing, are to be heard from the mouth of the Jotishees. They tell whether there is to be an abundance or a scarcity of rain, there will be unusual heat or cold, whether robberies, insurrections, &c., are to abound, whether unusual sickness is to prevail, &c. &c. Each individual on this day also learns what he is to expect during the year; whether health or sickness prosperity or adversity, is to be his portion, &c! &c. All this important information is not, of course, to be obtained without some compensation. And not only are presents to be given to the Jotishees, but the poor people are taught on this day to extend their liberality also to the Gooroos and Brahmins. The day is also to be celebrated by feasting. This is an auspicious day for commencing a new building, or engaging in any new undertaking.—Vide 16th March.

RAM NOWMEE.—On this day Ramchundra, the 7th incarnation of Vishnu, was born at *Ayodhya*, or Oude, about B. C. 1600.—Vide 23rd March Rama is supposed to be the same as the Grecian Dionysius or *Bacchus*, and the object of the incarnation was to effect the destruction of Rawun, the ten-headed tyrant of Lunka or Ceylon, which was at last done with the assistance of Hunooman, the chief of the monkey tribe. The birth of Rama is, strange to say, celebrated eight days previous to its occurrence, that is, from the first of *Chytru Soodh* to the ninth. From the first day the temples of

Rama are white-washed and illuminated in the evening, and the image of Rama is adorned with costly ornaments. In the evening the *Ramayan*, or the sacred legendary history of Rama, is read in the temples, and in the night *Kirtun* is preached by the *Hurridass*, who describes the morality and heroic actions of Rama. Nautches are also not omitted during the nights. In some temples Brahmins are fed with a rich and substantial dinner for eight successive days; these days are denominated *Rama naoratree*, or nine nights of Rama. During these days, many Hindus, both males and females, go to the temples of Rama to hear the *Kirtun* and *Pooran*. The last or principal day, is *Ramnowmee*, when, it is said, Rama became incarnate at noon. In honour of this incarnation, the Hindus fast the whole day. They get up in the morning, wash themselves, and put on rich clothes and ornaments, and repair to the temples of Rama at about nine o'clock. Every temple of Rama is well furnished this day, and images are decorated with precious ornaments and rich brocade. A *Hurridass* is engaged to describe the birth and circumstances that attended this incarnation. He continues his prattling till twelve o'clock, when he brings a small image of Rama, nicely ornamented and well clad, and shows it to his audience, and tells them that it is Rama who became incarnate; and puts it into a small cradle prepared for the purpose. The assembly then throw themselves prostrate before the image and worship it. Great is the rejoicing and acclamation of the assembly on this occasion; they fling *golal*, a red powder, on each other, and with great mirth about one o'clock they return home, and again go to the temples in the evening. The feast of Ramnowmee is more particularly observed by the votaries of Vishnu.

VUD SEVITREE (SAVITREE VRUTUM).—A fast observed by women at the root of the Indian fig tree, to preserve them from widowhood.—Vide 23rd June.

ASHAADY EKADASSEE is the eleventh of the light half of the month *Ashad*, and is dedicated to Vishnu. On this day, which refers to the summer solstice, commences the night of the gods, during which the deity reposes for four months on the serpent Seshu.—Vide 21st July.

NAG PUNCHAMEE is sacred to the demi-gods in the form of serpents. Ceremonies are performed on this day to ensure protection against the bites of snakes.—Vide 13th August. The serpent *Kahya* slain by Krishna, is worshipped at the festival, as was *Pythan* at Delphi.

SIIRAWUN NARU—(OR NARULL POORNIMA.)—On this day the rainy season is considered to be at an end, and a cocoanut is offered up to the sea to gain its favour towards those who now begin to trust themselves to its mercy.—Vide 24th August.

JUNMA AND GOKUL USHTUMEE—(JUNMA ASHTUMEE).—Instituted in commemoration of the birth of *Krishna*, which took place at midnight in the city of Muthoora. Krishna, who in many respects agrees with the Grecian Apollo, was the eighth incarnation of *Vishnu*, in which according to a large sect of Hindus, was manifested a greater portion of divinity than in any of the preceding ones. His uncle *Kowsu*, who it was predicted would be slain by one of his own family, endeavoured to ensure the destruction of the infant god, by placing guards over his pregnant sister; but the child was preserved from this and other attempts of his relations, who subsequently gave directions for the slaughtering of all newly-born-infants.—Vide 31st August. This holiday is considered one of the greatest among the Hindus, and is therefore observed by almost all the Hindu community; there are two sects among the followers of *Krishna*, and they solemnize the feast on different days. Those belonging to the one keep the birth-day of Krishna on the eighth day of the dark moon and those belonging to the other, the day following, being the one on which he was removed to *Gokul*, to the house of Nanda, through fear of his maternal uncle, who sought his destruction; and some even keep both days. The former fast on the day of *Junma Ashtumi*, and the latter on the day of *Gokul Ashtumi*. They fast the whole day, and at night they bathe and worship an image of the infant *Krishna*, adorning it with *tulsee*, a favourite plant of *Vishnu's* and with other flowers, in the manner enjoined in the *Shastra*; and at about ten or eleven P. M. they eat their *Phahar* food, which consists of fruits and some kinds of grain, being prohibited from eating rice and other grains that day. A Brahmin is called in to perform the *pooja*, and afterwards he himself is worshipped, and sent away loaded with *Dakshina* and other presents. This is all done according to the rules of the *Shastra*. The holiday is thus observed among the people of the higher castes. On the day of *Gokul Ashtumi*, *gowlees* (or keepers of cattle) keep a great jubilee among themselves, as Krishna was bred up among their race. They join themselves into a company, and frequent the houses of the people who follow their profession, holding each other's hands, dancing in the street, and repeating these words: "*Govinda, Govinda,*" where they are honoured either by throwing over them curds, or presenting them with a certain quantity of curds. These people are called *Gopalls*—protectors of cows. But the most extraordinary thing relating to this festival is the following:—On the night of *Junma Ashtumi*

crowds of people, generally of the lower ranks, flock into the temple of *Canoba*, which is commonly known by the name of *Muth*; there they hire native music, and continue shouting and making a great noise, so as to deafen one's ears. The *Bhugat* of *Canoba*, or the head of the temple, who is very often of the *Shudra* caste, and who is considered a supernatural being, at least at the time, with great solemnity and grave countenance makes his way through the assembly and stands before the shrine of *Canoba*, and offers prayers to the idol of *Canoba*, which is richly decorated on the occasion; accompanied by the playing of tom-toms, and acclamations of joy from his disciples. He is at first quite calm, but shortly after shows signs of inspiration by the god. He begins to untie his shendi, or the tuft of hair on the crown of his head, and then slowly shakes his limbs. By degrees his whole frame quivers, and he throws his whole body into violent contortions, dancing and muttering strange, ambiguous and wild sounds, which no one can understand. He then takes his scourge, which is kept near the shrine, and scourges himself as if he were insane, and performs many other equally strange actions. No sooner does the assembly around see him in this predicament, than, believing that the spirit of the god has entered into him, they burn incense before him and fall prostrate, and pray him to be merciful to them. When he has received divine homage, he quietly takes his seat, but does not cease quaking and trembling. His disciples, who are always near him: then commence, one after another, to shake themselves and dance in the same way; and the spirit of the god is believed to enter them also. This day the great *Bhugat* can create new disciples, and give them the power of bringing the spirit of the god into their bodies. Sick persons, persons possessed of devils, children, &c., are brought to the temple to receive the benediction of the *Bhugat* and his disciples: he rubs a little ashes on their foreheads, passes his hand over their heads, and gives them full assurance of their speedy recovery from their sickness without taking any medicine. The poor patient, with full confidence, returns home, expecting the fulfilment of the *Bhugat's* promise, but probably, to his great disappointment and distress, he gets worse, or is perhaps cut off next day. It is a great wonder, notwithstanding such disappointments, that the eyes of the ignorant are not opened to see the impotency and imposition of the *Bhugat*, for they still remain as faithful to him as ever. It is the subtlety of his speech and the dexterity of his actions, that delude them. The *Bhugat* receives large presents on this occasion from the followers of his tenets, and he is held in great respect among the orthodox Hindus, and even among persons of some other tribes too. On the following morning the *Bhugat* collects the circle of his disciples in front of the temple, and orders a sufficient quantity of curds to be thrown over their heads to wet their whole bodies: they all begin to dance in company, holding each other's hands, and occasionally throwing themselves on the ground and besmearing their bodies with mud, shouting as loudly as they can. The *Bhugat*, in the meantime, with a scourge in his hand, forces his way into the crowd with all his pretended dignity, and stands in the midst of the crowd, and looks in all directions in his feigned solemnity, and then lifts up his powerful scourge and puts it around the neck of one of his disciples as a token of his regard, and draws him towards himself; when the disciple trembles a little, and then stands firm, stretching his hands towards the sky, with his eyes closed. No sooner does the *Bhugat* see him in this state, than he scourges him two or three times, so adroitly that it gives him no pain, while to the eye of the spectators it appears a prodigy that he does not feel it. This is repeated till he has shown the same mark of approbation to the whole body of his disciples,—when he ceases, and sweetmeats are distributed among the disciples and to all the spectators. Thus terminates the feast of *Gokul Ashtumi* among the people of the Shuhdra caste.

PITHOOREE, OR PRACHEEHEE AUMAWASYA.—A ceremony observed at the New moon of the month *Shrawan*, at which the 64 Yogines, or female attendants of the goddess Doorga, are worshipped—particularly it is said by women, with the hope of obtaining issue.—Vide 7th Sept. The 30th of the month of *Shrawan*, or the last day of the dark half of the moon is denominated "*Prachee Amawasya.*" Prachee is, it is supposed, one of the goddesses of the East. She is commonly known among the people of the Konkan and Decan by the name of Pethoorie. Wealthy Banians and other people of Guzerat go to Walkeshwar on the previous evening with their families, to remain in the *Dhurrumsalla* during the night; and, on the subsequent morning, they bathe in the tank of Walkeshwar. (This tank is called by the the natives *Banghunga i. e.*, the Ganges produced by an arrow; and they give a marvellous account of its origin. They say, when *Rama* visited this part of the world, and found that there was no pure water to drink, he pierced the ground with an arrow from his bow and thus brought the Ganges into existence.) They also perform *Shradhas* on the margin of the tank, and ceremonies for procuring the deliverance of their departed ancestors from the thraldom of *Yama*, the king of the infernal regions, if they still remain at his court or in his dominions. They afterwards repair to the temple of *Walkeshwar* and

worship his image, after which they take their meals. The remaining part of the day is spent in amusements, among which gambling is not overlooked or neglected. Booths are erected in the locality of the temple, and furnished with all kinds of the choicest articles that please the fancy or delight the taste. The Hindus on this occasion squander away hundreds of Rupees in hiring vehicles, and buying toys and sweatmeats for their children. This holiday is not observed by the majority of the inhabitants of the Konkan and Deccan. It is kept up chiefly by those women who lose their children in infancy. They fast this day and worship an image of *Pethoorie*, by adorning it with various kinds of fruits and flowers, through the medium of a Brahmin priest.

GUNESH CHOUTH, OR CHUTOORTHEE.—On this day was born Gunputtee, or *Gunesh*, who is considered as the God of prudence, and invoked, like Janus, at the commencement of all undertakings. The manner of his birth is differently told; one story relates, that as the God *Kartikeyu* was created by Shiva without connubial assistance, in like manner *Gunputtee* was formed by his consort *Parwuttee* from the turmeric and oil scraped off from her own body while bathing. The loss of his human head, and the substitution of that of a female elephant with one tusk, is also variously explained. By some, his head is said to have been cut off by Shiva when he endeavoured to prevent the god from entering the chamber of Parwuttee when performing her ablutions as above. According to other accounts, it was reduced to ashes by a glimpse from the eyes of *Shunee* or Saturn, when all the gods went to look at the newly-born child, and its place supplied by that of the animal first found, which happened to be an elephant. Clay images of the deity are formed, and after having been worshipped for nine or ten days, are thrown into the water. The Chinchore or Chinchwud (properly Deo,) who resides at the village of that name near Poona, is supposed to be an incarnation of this god, who granted to a holy Gosayeen, who had won his favour, that the divinity should be continued in his family for seven generations; and though the present one has exceeded that limit, the miracle is perpetuated by the Brahmins for self-interest.—Vide 11th Sept. It is commonly said among the Hindus, that the *Shastra* enjoins its followers the worship of *Mritica*, Earth, in the following forms, three times a year:—The first of these is *Nagpunchmee*, on which day a snake of clay is made and worshipped; the second is *Gokul Ashtumee*, when a clay image of the infant *Krishna* is made and worshipped; and the third and the last is *Gungsh Chuttoorthee*, on which day a clay image of Gunesh is worshipped. This being the last day of the worship of *Mritica* it is observed with greater pomp and more ceremonies, conviviality and music, than the two others. The image worshipped on this occasion has four hands and an elephant's head. The mouse, being *Gunputtee's* favourite vehicle, is also placed near his image, richly saddled and bridled. Besides this, the worship of *Gunesh* may be traced to his origin. But different accounts are given in different *Purans* of that origin, and the consequent introduction of his worship, which it would be rather a difficult task to detail. The image of *Gunputtee* is either made in the house or purchased from an artist: it is gilt with the finest gold, and painted with superior and variegated colors: much labour and ingenuity is bestowed on it by some to render it elegant and attractive, according to the taste and pecuniary means of the worshipper. The 4th of the month of *Bhadrapud* is the appointed period for the celebration of this feast. On the previous day, the worshipper cleans and whitewashes his house, and furnishes it with all sorts of costly furniture that can be procured. The profusion of light is the first thing that would attract one's eye. On the following morning, *i. e.* on the day of *Gunesh Chuttoorthee*, they bring the image home (if it be bought) with great splendour, accompanied by native music, and with all the honors of a god. A place where the god is to be seated is prepared, either in the form of a covered shrine, or open space, which is adorned with all kinds of fruits and flowers strewed round it, and the twigs of trees hung over in clusters; after which commences the business of the officiating priest, who sits near the master of the house, and begins consecrating the idol, by reciting incantations or *muntras* from his book, and throwing over it red coloured rice: thus, after performing many consecrative ceremonies, he brings from heaven the god-head into the image on earth. Being thus installed, the devotee places before him, *Nayavedh* food, which consists of sweetmeats, and invokes the god to partake of the offering. Afterwards he falls before him, and prays him to be gracious to him and his family. To perform the whole *Pooja* according to the rules of the *Shastra* requires at least three or four hour's time. By the generality of the people *Gunputtee* is kept one day and a half; but by some five or ten days according to the wealth and wish of the proprietor. A discourse is delivered in commemoration of his godly exploits by a *Huridass* in his presence, to which friends and relatives are invited to attend. A large party of Brahmins are entertained at a sumptuous dinner, in honor of *Gunesh*, and they are then dismissed with the usual *Duksheena*. On the last day preparations for his departure are made. Even-

ing is the appointed time for parting, when the master of the house performs *Ooter-puja* through the priest, who takes away the divinity with which the image was invested by repeating certain *Muntras* or charms; flowers, fruits and sweetmeats are offered to the idol, and *artee*, that is lighted wicks, are moved before him, accompanied with music and hymns, he is invoked to bless the owner and his family, and remove any calamity that might befall them throughout the year. Afterwards the Brahmins are presented with *Duksheena*, and the image is seated in a palankeen, or in an ark expressly made for the purpose, adorned with fresh flowers and carried to the sea or tank in procession, which consists of the master of the house, his children and relatives, who are richly attired on the occasion. When they reach the place, they take out the image and commit it to the water, with every devout feeling of regret for its absence till next year. On the day of *Guuesh Chuttoorthee* the Hindus are prohibited by the *Shastra* from looking at the moon, and therefore prejudiced and credulous Hindus are afraid to look at her this evening, for fear of incurring any calamities throughout the year. If the vulgar people happen to see the moon, they try to provoke their neighbours to abuse them, and comfort themselves with the idea that the calamities incurred will be all comprehended in that abuse, and removed by it.

RUSHEE PUNCHAMEE.—Observed in honor of the seven Rushees or Sages, who are supposed to be the seven bright stars in the *Great Bear*.—Vide 12th September.

GOWREE.—One of the names of the goddess *Parvuttee*.—Cakes are made in the shape of pebbles, and eaten at night time.—Vide 14th September.

WAMUN DWADASHEE.—Instituted in commemoration of the fifth incarnation of Vishnu, in the shape of a dwarf, to prevent *Bullee* from obtaining dominion over the three worlds through the effects of his religious austerities. Bullee promised the dwarf at his own request to grant him as much land as he could compass at three steps. On the ratification of this promise, the first two strides of the incarnate deity embraced the heaven and the earth: there being now no place for him to put down his foot for the third time., Bullee magnanimously told him to put it on his head, which the dwarf having done, crushed him down to Patala, the dominion of which was conceded to the ambitious monarch—Vide 19th September.

PITRU PUKSH.—The dark half of the moon *Bhadrapud*, are sacred to the Pitris, or progenitors of mankind, to whose heaven the souls of the deceased ascend after the celebration of funeral rites, which is particularly proper during this season.—Vide 23rd September.

DUSSERA.—This festival, called Doorga Pooja or *Durgatsuva*, is supposed to relate to the autumnal equinox. On this day, in commemoration of the victory of *Devee*, the wife of *Shiva*, over the monster *Maheeshasoor*, her images, after having been worshipped for nine days, are thrown into the water.—Vide 17th October.—On this day also *Rama* marched against *Rawauna*, on which account the Mahrattas seem to have selected it as a proper period for commencing their plundering excursions.—This day is observed thus:—Early in the morning, the Hindus, having washed themselves perform the *Pooja* of their household gods in conjunction with that of all their *shastrical grunths* or religious books. Marathas and Kshirtrias, or those who consider themselves of the military race, worship the implements of war, and ask protection of them throughout the year, under a conception that to the propitiousness of the sword they owe every prosperity. Thereafter at noon they take dinner in the company of their relatives who may have been invited on the occasion. In the afternoon they go to the temples in procession, with friends and relatives, and children, richly attired. Moombadavee and Bhooleshwur are the principal scenes. Both of these places are thronged by dense masses of Hindus, bearing each in his hand flowers and a branch of a certain tree *(Apta)* denominated *sona* (gold), which is held highly sacred and indispensable in commemorating this day. On entering the temple they offer the *sona* and flowers to the image, accompanied with prayer; they also give sundry *Duxuna* to the Brahmins, and return home, visit their friends and relatives, present them with a leaf or two of this imaginary gold, and conclude with a hearty embrace, and receive similar treatment in return at the same time. The *sona* forms the chief article of the Dussera holiday. The vicinity or front of the above temples is surrounded by the vendors of this plant, who range themselves with baskets full of branches in bundles. At night an illumination is made. This day is considered by the Hindus most auspicious for sending their children, who are beginners, to school. The preceding days of the Dussera are called *now-*

ratree, a compound word for nine nights. During these previous nine days, the devotees of Durga keep themselves holy, engage a Brahmin to read hymns before her, in which her exploits are extolled and her rewards to her votaries are described. On the ninth day, at every temple of Durga, or *Huvun*, a sacred fire is created and fed with rice and clarified butter, and adored by the repeating of muntras. It is customary among the Banian women to keep up a dance during these nine nights, called *Gurbha*, which is accompanied with religious songs. The celebration of the Dussera owes its origin to the *Panduwas*, the five sons of Pandoo having selected this day after completing their exile of twelve years, as an auspicious one for making preparations for the tremendous war with their paternal cousins, the *Cowruva*s of which the Puranas give an account, occupying the whole volume. The Hindus, decorate the horses with flowers this day; putting garlands of flowers around their necks. It is said that Parth, the most invincible of the five Panduwas, who had a peculiar fondness for horses and a pre-eminent skill in the art of chariot-fighting, and from being auxiliaries in the matters of battle, washed his favourite milk-white horses with great warlike spirit, put garlands of flowers around their necks, and tapped them, in token of fondness and approbation, with his own hand; owing to this legend, it seems, the decorating the horses with flowers this day is observed.

DEWALLEE—(from *Depawali*, Sanscrit, signifying a row of lamps)—is celebrated in honor of the goddess Kalee, or Bhuwanee, who was formerly propitiated by human sacrifices, and of Vishnu's victory over the demon Tareekee.—Vide 5th November. The festival, however, seems to be more peculiarly consecrated to Lukshmee, or the goddess of prosperity. The first day (Ushwin vudh) is termed *Dhanootruyodashee*, and Sowkars now count their stores and perform pooja to their wealth. On the *Umawasya*, or new moon, there being a fresh account, pooja is again performed before the old and new books. The festival lasts altogether five days. The Dewallee means the feast of illumination, or ranges of light. It is celebrated for the period of five days, during which houses are cleaned, white-washed and illuminated, a quadrangular floor is made in front of the house, and painted with different coloured powders, it is called *Rangolle*. Gambling is the chief recreation of the feast. The Dewallee commences from the 28th day of *Ashveen vudh*,—this day is denominated *Dhuntriyodashi*. This day they collect all the treasure in their house and worship it giving the name of *Luxumee* the goddess of wealth; a light is made and delicated to *Yama*, the god of the infernal regions, and every preparation is made for the succeeding morning. Fireworks, crackers, spouters, &c. are displayed, and gambling shops are opened, which continue till the end of the holidays. The 29th is *Nurruckchuttordashee*. This day Vishnu killed Nurruckasoor, an invincible giant after a desperate battle, and entered his city early in the morning, with the palm of victory, when the people illuminated the city and received him with great joy and acclamation; and the women of the city having adorned themselves, went before him with lighted lamps and congratulated him. The Hindus keep this day to commemorate this great conquest. This day they get up early in the morning, fill the house lights, rub their bodies with perfumed ointment, and bathe themselves with hot water. No member of the family is left unbathed; new clothes and ornaments are put on, and children are decorated. When this is done, the mistress of the house performs a sort of ceremony called *Artee*—by placing wicks either in silver or brass dishes, which mean that God would remove all the difficulties and make the year happy—when each male member makes her a present of money; sweetmeats are distributed, and friends are invited to dinner. The 30th, *Amawashia*, last day of the moon, is the day of *Saraswuttee*, the goddess of learning and wealth. It is vulgarly known by the name of *Pedipoojun*, or the worship of the shops. This day the year of Vikram Sumvut, or Vikram's era, closes, all the merchants close their accounts this evening. New journals, ledgers and daybooks are bought and worshipped through a Brahmin priest; new entries are made in the account books: writers are sent to different shops with rupees to credit in their names, on this auspicious evening. *Sarswuttee* is invoked to render the subsequent year prosperous, and to be with them throughout the year; then the Brahmins are sufficiently paid for their labours, and servants receive a present of some money, according to their rank: this day is celebrated by all classes of people—Banians, Parsees, Mahomedans, &c. The first day of *Kartick Shoodh* is Baliraj, the day of king Bali. This day Bali was sent to *Patal*, or the lower regions by Vishnu, for his great merit. They also rise up very early in the morning, make the light, clean the houses, wash their bodies and fill a basket with all the rags and rubbish in the houses, put a lighted lamp over it, and throw it outside of the house, repeating these words; "Let all the misery and troubles go, and the kingdom of Bali come." After the ablution, the women make an image of Bali Rajah and worship it; presents are given to the Brahmins and other mendicants; and playing with dice is continued with greater ardour and spirit than ever. The 2nd day of Kartick Shoodh is *Yama Dwitiya* which is commonly known by the name of *Bhaubij*. This day Yama, the king of the infernal regions, went to his sister to dine, and to perpetuate the memory of this, the Hindus must go to their sisters' houses and take

their meal with them, and make them a present of some money or gold ornaments, and thus please the king, who will save them from the punishment of their sins.

KARTICK EKADASHEE—is the eleventh day (in some years the fourteenth), of the light half of the month Kartick, and is celebrated in honor of Vishnu. On this day the god is supposed to rise from his slumber of four months—a fable which has reference to the sun at the winter solstice—Vide 17th November.

KARTICK POORNIMA—is the full moon of the month Kartick. On the fifteenth of this month, as well as of Magh, Ashad and Vaishak, each of which day is called "*Donumasya Kuru*," gifts to Brahmins are considered indispensably necessary. Shiva also is said to have gained his victory at this season over the monster "*Tripoorasoora*." —Vide 20th November. Kartick Shoodh Poornima, the full moon in the month of *Kartick* is called the *Tree Poora Soora*, master of the three cities. This demon is said to have become so powerful that he defeated almost all the gods and drove them out of their habitation; when they formed a levee, and went to *Kylas*, the abode of *Shiva*, and represented to him their grievances, who after lending an ear to their pitiful supplication, comforted them by the assurance, that the evil should be soon removed, and send them back to their respective homes. He accordingly made a car of the earth, the wheels of which were the sun and the moon. *Brahma* was chosen his charioteer, the mountain Himalaya formed his bow, and *Wasookey*, the king serpent, his bowstring. Vishnu himself became his quiver. Thus equipped, *Shiva* rode himself in it, and destroyed the mighty giant after a struggle. To perpetuate the memory of this great event, the women of the Hindus get up very early in the morning this day, at about two o'clock, and wash themselves in cold water, and repair to the temple of *Shiva*, and worship his image. Afterwards they return home, and present a Brahmin with a lighted lamp, made either of silver, copper, or brass, according to their ability, along with some fruits and *Dukshena*, a present in hard cash; this is called *Deepdan*, or present of a lamp. In the evening an illumination is made in the temples of *Shiva* and a pillar of stone built in front of them for this special occasion. A grand fair is also celebrated this day in honor of *Walkeshwar*, an image of *Shiva* at Malabar Hill. It is kept for three days, when booths are erected, and shops are adorned with all kinds of articles by the people of all denominations. The Hindus, both the rich and poor, Brahmins and Shoodras, go there and worship the image of *Shiva* and buy sweetmeats and toys for the children. Some of the wealthy Hindus remain there with their families for three or four days in the *Dhurumsalla*, or inns built by them, but the poor return the same evening. During these days hundreds of rupees are spent in hiring conveyances, and purchasing sweetmeats and toys. Among the many other entertainments, gambling is not overlooked.

BIRTH CEREMONIES.

Different ceremonies are prescribed by the Shasters to be observed at the period of conception, and the different stages of pregnancy. "*Jatkurm*" is to be performed at the birth of the infant, and consists in giving it a drop of honey out of a golden spoon before dividing the navai string. Other rites are to be observed on naming the child twelve days after its birth—bringing him outside the house when three months old—on feeding him with the hand at six months—and, if a male, on shaving his head at the age of three years.

MARRIAGE CEREMONIES.

Among Brahmins the male may be married at any time after the "*Moonj*," or investiture with the sacred thread, which is done within the age of eight years, and among other castes at any age. The female should not be ten years old, and her age must be less than that of her husband; and she should be married before the appearance of the signs of puberty. The Shastras mention eight kinds of marriage, but only one is observed by the "higher castes," named *Bruhma*, when the charges are severally incurred by the fathers of the parties. The principal marriage ceremonies among Brahmins are the "*Lugunputricka*," or writing by the Joshee or Astrologer of the names of the parties, and the day and hour at which the wedding is to take place; the "*Suptupudee*," or walking round a fire three times, at each time seven steps, and tying together the garments of the parties, and the house or burnt offering; after which the contract is indissoluble. The girl is given away by her father in his own house, in which it is usual for her to remain till the appearance of the signs of puberty, after which she proceeds to the residence of her father-in-law, where her husband also resides, or to that of the latter, should it be otherwise. Particular months and junctions of the planets are prescribed for the celebration of marriages in different castes: as also the same castes

in different countries have their peculiar ceremonies, which are too various to be described here. The "*Phuishobun*" is the performance of certain ceremonies on the occurrence of the first menstruous symptoms.

DEATH CEREMONIES.

On the death of a man, the performance of his funeral obsequies (*Kriyase.*) and of the monthly and annual purificatory ceremonies, devolves on his heir. The principal times for performing "*Shradh*" are eleven days after death; secondly, every month; and thirdly, on the anniversary of death. Brahmins are unclean for ten days after the death of a relation,—the military class for twelve,—the mercantile for fifteen,—and Shoodras for thirty. Among the Hindus, generally, the body of the deceased is burnt, but that of an infant under two years of age is buried. The "Shradh" consists in the offering of rice, flowers, water, &c., to the deceased and to his manes, in order to enable his soul to ascend to the heaven of the Pitris, or great progenitors of the human race.

MAHOMEDAN FESTIVALS.

RAMZAN.—This Mahommedan fast commences each day throughout the month of this name, when the first streak of light borders the eastern horizon, and continues until the stars are clearly discerned in the heavens. During the whole period not the slightest particle of food, not one single drop of water, nor any other liquid, passes the lips from the dawn till the appearance of the stars in the evening. Each day during the fast is passed in occasional prayer, besides the usual namauz, and in reading the Koran or the lives of the prophets.—Vide 16th April. The fast is first broken by a cooling draught called *Dundhie*, the same which is used in fevers. It is composed of the seeds of lettuce, cucumber, and melon, with coriander, all well pounded, and afterwards diluted with cold water; rose-water, sugar, syrup of pomegranate, and kurat, are also added: the whole preparation is made in the zenana and then drunk by basins full by all true *Rozedhaurs*. Plain boiled rice, with dhie (sour curd) and sugar forms the first morning's repast of the Eed; dried dates are eaten with it in remembrance of the prophet's family, whose greatest luxury was supposed to be the dates of Arabia. The conclusion of the month Ramzan is celebrated as an *Eed* or festival, and is hailed with great rejoicing and merriment, as a sort of reward for their severe abstinence. In every house the same dainties are provided, every amusement that can be thought of is indulged in; the nautch-women in the apartments of the gentlemen, and the dominee in those of the ladies are in great request, the zenanas ring with festive songs: and all is life, joy, cheerfulness, and cordiality on this last day of the Ramzan, when the lady of the mansion sits in state, or receives nuzzurs from inferiors, and to grant favours to others.

EED.—The followers of Mahommed claim to be the descendants of Abraham through his son Ishmael, who, they aver, was chosen as the offering to the Almighty, and not Isaac,—thus differing from the belief of the Jews and Christians, and supporting their assertions by traditions which they deem conclusive evidence on the subject, in opposition to the authority of the Bible. The offering thus made to heaven is annually commemorated by the sacrifice of particular animals, such as camels, sheep, goats, kids, or lambs, according to each person's means, and answers the double purpose of honouring the memory of Abraham and Ishmael, and also assisting to a meal in a time of great need. The followers of Mahommed believe that the entrance to Paradise is guarded by a bridge made of a *scythe*, or some such equally sharp instrument, affording a precarious and unstable footing. To enable them, therefore to pass without danger, they believe that the number of animals they have sacrificed at the feast of Eed will be present to lend their aid to help them over in safety.

EED KORBAN.—In commemoration of Abraham offering up Isaac, but in Mahommedan estimation Ishmael, and this is the day on which they annually perform the Haj at Mecca.—Vide 22nd July.

MOHURRUM.—A celebrated mourning festival, held annually in remembrance of the first-martyrs of the Mussulmans—Hassein and Hoossein—the two sons of Fatima and Ali, from whom the whole race of the Syuds have generated. Hassein was poisoned by an emissary of the usurping Calipha, and Hoossein, the last victim of the descendants of the prophet's family to the king Yuzeed's fury, suffered a cruel death, after the most severe trials, on the plain of *Kurbulla*, on the tenth day of the Arabian month Mohurrum, the anniversary of which catastrophe is solemnized with the most devoted zeal. Hassein and Hoossein were, as above stated, the two sons of Ali, by his cousin Fatima, the daughter of Mahommed; and after the murder of their father

by the contrivances of the Calipha, they with their families removed from *Shawn*, the capital, to Medina. After residing there for several years, the people of *Shawn* being tired of king Yuzeed's tyrannical rule, invited Hoossein to return to the capital and take up his lawful right as Emaum (Leader of the Faithful.) Before accepting this invitation, Hoossein sent Moslem, his cousin, as a messenger, to report the true states of affairs to him; but on his arrival with his two sons at *Shawn*, he was seized by order of King Yuzeed, and cast from a precipice, and his two innocent sons were barbarously murdered, for the sake of the reward offered for their heads. This forms the subject of the ten days' bewailing during the Mohurrum. The Mahommedans are divided into distinct sects, called the Sheas and the Soonies. The former believe Ali and his descendants to be the lawful leaders after Mahommed, and the latter are pursuaded that the Caliphas, as Aboubuker, Omar, &c., are the only leaders to be accredited—hence quarrels, animosities, and dislikes are hoarded up, to be avenged during the Mohurrum. The festival begins on the first day of the moon (Mohurrum). Tazias, (a term signifying grief, and applied to a representation of the mausoleum erected over the remains of Emaum Hoossein at Kurbulla,) made of ivory, ebony, sandal-wood, cedar and some wrought in silver filigree, and indeed of every variety of material from pure silver to bamboo and paper, according to the rank and wealth of the party, are exhibited in every direction, and conveyed in procession through the street. Mourning assemblies are held morning and evening in the Emaum Barrahs, during the Mohurrum, and the head priest or preacher recites a subject for each day's service, from the various books composed on the subject, descriptive of the life and sufferings of Hassein and Hossein. The Murseeah, a poetical composition of great merit, and embracing all the subjects they meet to commemorate, is chaunted with great effect: the names of their lawful leaders are recounted with blessings, and that of their usurpers, the Caliphas, with curses. Then comes the procession of Dhull Dhull, the name of Hoossein's horse killed at Kurbulla, beautifully caparisoned; and finally the Tazias are deposited with funeral rites in the public burial grounds, when the Mohurrum ceases until the return of another year. The Taboot is a slight framework of bamboo, in the shape of a mausoleum, covered and ornamented with coloured paper and tinsel, and is designed to represent the mausoleum built over the remains of the slaughtered Hoossein. They vary considerably in size and appearance, according to the taste and ability of those who build them. In some of them is the representation of the Tomb of Hassein and Hoossein. Before these Taboots incence is burned, and various other rites are also performed. The Taboots, it is said, are peculiar to India. They, of course, are not mentioned in the Koran, and they are not built either by the inhabitants of Persia or Arabia. Many Mahommedans regard them with strong disapprobation. In Bombay the large portion of the Mahommedans unite in building the Taboots. These are taken out, and, accompanied with music, carried in procession through the Bhendy Bazar, from midnight of the ninth until three o'clock of the morning of the tenth day, and from two to six o'clock on the afternoon of the same day, on their way to the beach in Back Bay, where the greater part of the Taboots, after being stripped of whatever was possessed of value, are cast into the sea. The practice of building Taboots seems to be losing ground in Bombay, a portion of those who formerly united in this having adopted the views of those opposed to those things. The Indian Mahommedans, who do not unite in building the Taboots, are accustomed to go on this occasion to the mosques for five successive evenings, to listen to the account of the death of Hoossein. Their domonstrations of grief, however, are not equal to those of the Moguls and Persians, who while listening to the recital, weep aloud, and smite violently upon their breasts. These are accustomed to meet at the Musjid, a little to the east of the American Mission Chapel, near the Baboola Tank, in Mirza Mahomed Ali Khan Street. In Bombay there is, strictly speaking, no representation of the battle which was fought previous to the death of Hoossein. Some two or three horsemen, bearing flags, enter the large yard adjoining the Emaum Barrah, with loud wailings and are followed by two horses caparisoned, to represent those which were for the use of the fallen Hoossein. One person on horseback, with a long sword apparently run through the head, and covered with blood, joins in the wailings. A female infant in deep mourning, sitting at the door of a small mausoleum, which is carried on the shoulders of men, constantly cast ashes or cut straw upon her head, in token of grief. These pass round in a circle, accompanied or followed by a company on foot, who beat upon their breasts, crying, "Hai Hassein, Hai Hoossein." Sometimes a person represented in a dying state, his body covered with wounds and blood, and darts and daggers run into it, is carried about in procession. The whole is indeed, a strange exhibition, fitted to excite in the mind of the enlightened spectator mingled feelings of pity, wonder, and grief. We are not sufficiently informed to give an accurate account of all that occurs on this occasion. It would seem that this festival is now celebrated with less effort and effect than formerly. It is apparently becoming more and more a farce. The grief is doubtless for the most part feigned. The

decline of the peculiar zeal of the Mahommedans must necessarily lead them to enter into these with less spirit.—Vide 11th August.

PARSIS.

The Parsis of India are divided into two Sects,—the "Shaenshoyees" or "Rashmis," and the "Kudmees" or "Churigars," the former of whom constitute the larger portion of the nation. This division originated only about a hundred and fifty years ago, when a learnd Persian priest, named Jamasp, arrived in India and found that his co-religionists differed with their brethren of Iran in their calculation of time by full one month, and in other minor points relating to their "liturgy." Serious disputes arose in consequence, which ended in the formation of the two sects, the Shaenshoyees adhering to their own views, and the Kudmees adopting the opinions imported by Jamasp, thus agreeing with their Persian brethren. Notwithstanding this division, no estrangement exists between each other in their social intercourse. The difference only lies in their computation of time, and in some slight variations in the forms of prayers. Intermarriage is allowed, as well as admission to each other's places of worship.

The Festivals of the Parsis, unlike the Hindus and Mahomedans, are celebrated with little or no outward pomp. The holidays are mostly occupied in prayers in the morning, and festivities and rejoicings during the rest of the day. Some of their religious institutions can be traced to a very ancient period. The festival of the NOWROZ dates to upwards of three thousand years before Christ, and is kept to this day by most of the nations of Western Asia, notwithstanding their difference of creed. In a paper by the late Col. Vans Kennedy, published in the second volume of the "Transactions of the Bombay Literary Society," we are informed, that the Emperor Ackbar adopted the "Nowroz," and fourteen other festivals of the Parsis, for the observance of those who were attached to his favourite doctrines of the "Alahi faith," or the "religion of God," which he fruitlessly endeavoured to introduce among his people.

PAPPETI, or NEW YEAR'S DAY.—Among the festivals observed by the Parsis the first and universally kept is the Pappeti, or New Year's Day. This day is celebrated honor of Yezdezerd, the last king of the Sassanide dynasty, who was dethroned by Khalif Omar about A. D. 640. The ancient Persians reckoned a new era from the accession of each successive monarch, and as Yezdezerd had no successor, the date of his accession to the throne has been brought down to the present time, thus making their current year 1224. In their calculations of the year only 365 days are allowed; the leap year is unknown to them, though there are records which prove that in every 120 years one month was added to the period, to correspond with the solar year. The year is divided into twelve months of thirty days each, and five days, or "Gathas," as they are called, are added at the end to make up the dificiency. On this day the Parsis rise early, and dress themselves in new suits of clothes, and those piously disposed say their prayers in their private residences, or attend the fire-temples, where a large congregation is gathered. After prayers the Parsis visit their friends and relations, when the "Hama-ijour," or "joining of hands," is performed. This ceremony is a sort of greeting, corresponding to the European fashion of wishing each other, a happy new year. Their friends and relations are invited to breakfast. The morning being thus occupied they spend the rest of the day in their country houses and clubs, where feasting, rejoicing and nautch-parties are kept up till a late hour. Alms are also given to the poor in the course of the day, and new suits of clothes are presented to their servants and dependants.

KHORDAD-SAL.—The second of the Parsi festival is the "Koordad-Sal" or the anniversary of the birth of their prophet Zoroaster, who was born in the city of Rehe in the north of Persia in the reign of Darius Hystaspis, about 520 years before Christ, according to Greek writers. Heeren places the birth of this celebrated personage about 1200 year's anterior to that ascribed by the Greek chronologists. The Parsis themselves differ as to the exact time of the birth of their prophet; a part of them fix the period at B. C. 389; others at B. C. 638. Religious ceremonies are performed in the morning by the women of the family and the priest; the men as usual on such occasions limit themselves to private prayer.

AMARDAD-SAL.—This holiday, which fall on the day immediatly after the preceding festival, appears to have no origin in the books of the Parsis. It is merely kept up as the continuation of the "Khordad-Sal;" no religious ceremonies are required, and the day is always spent in the enjoyment of epicurean pleasures.

FURROHURDIN JASAN.—This day is set apart for the performance of ceremonies for the dead, Furrohur meaning soul or spirit. On this day the superstitious portion of the people in Bombay attend on the hills near Chowpatty, where their "dockhmas" or "towers of silence" are situated, and there perform prayers for the dead, as if they had a better chance of being heard at that place on behalf of their deceased relations than any other place of worship. This holiday is kept with some slight variations in other parts of India. The Parsis are enjoined by their religion to pre-

serve the memory of their dead by annual religious ceremonies performed in the house; but such of their friends who die on long voyages or in unknown places, and the date of whose death cannot be positively ascertained are, according to the forms of their religion, honored by sacred rites on this day. This ceremony consists in a man or woman preparing small round pieces of baked bread, called Darouns, which are put in a tray or other copper vessel, along with some fruits and flowers, over which the priest performs the prayers of the Baj, or Vaj as it is called by M. Anquitil du Perron in his work, the "Zend Avasta." According to the translation published by this learned Frenchman, the Baj, is an invocation of the manes of the departed, and of such of the Angels who have a direct controul over the souls of the dead after their departure from this world. Prayers of this sort are still performed among the Hindus and many sects of the Mahomedans, and are not unknown, we believe, in some of the Roman Catholic countries of Europe.

ARDIBEHEST JASAN.—This festival, as its name implies, is maintained in honor of Ardibehest Amsaspund, the controlling angel over the sacred fire, that element being one of the symbols of worship. The Fire temples are crowded this day and prayers offered to the Supreme Diety.

THE NOWROZ.—The fifth on our list is the celebrated Nowroz, called by some as the Nowroz-Jumshid, or the Nowroz-i-Multan, the King's day. This celebrated festival falls generally on the 21st day of March, and is co-eval with our Vernal Equinox, and the Mukhr Sanscranti of the Hindus. This day is observed by the Modern Persians, the Arabs, the Turks, and several other Asiatic nations, for the computation of the solar year, and for state purposes, such as the collection of revenue, and the arrangements for the agricultural operations of the year. Eastern writers date the origin of this festival from the time of Jamshid, the third king of the Peshdadian dynasty of Persia, and our own Western writers are not disposed to doubt this statement. Jamshid is supposed to have flourished, according to Bailey, 3,209 years before Christ; the Shah Nameh celebrates him as the first prince of his race who introduced civilization among mankind, and established the computation of time. If we are to believe the host of Persian writers, the exquisite Bas reliefs at the ruins of Persepolis.—Still visible in all their pristine beauty after a lapse of two thousand years,—are representations of the Court of Jamshid; more especially on the festival of the Nowroz. The sculptures at this remarkable place, indeed, contain representations of the Courts of Ancient Persia with their long train of attendants bringing in offering to the feet of the Monarchs; and as the Nowroz is a sort of "revenue settlement" day, when the chiefs, of different provinces lay their annual contributions before the throne, and are allowed audience with the monarch, the idea of a part of the Persepolitan bas-reliefs being a picture of some ancient King of Persia holding his Court on the day of the Nowroz, does not appear to be without a good foundation. In Persia this festival is kept for several days with unusual pomp by all the inhabitants, whether Mahomedans or Parsis. In India it is simply a day of rejoicing.

AVA ARDUI SUR JASAN.—Ava, in the Zend text, is the name of the Angel who presides over the sea, and this "Jasan" or festival is held in his honor. The Parsis are simply required on this day to approach the seashore, or any stream of water, and chant the prayers which are writen in Zend; but owing to their long residence in this country, they have borrowed many Hindu rites in the observance of this holiday, and offerings, of sugar, cocoanut, flowers, &c. to the sea, on this day, are not uncommon. The better informed portion of the community, however, do not join with their brethren in these superstitious acts. In Bombay a Fair is held on the Esplanade in honor of this festival.

ADDAR JASAN.—Addar, another synonyme for fire, is the name by which the ninth month of the Parsi year is called. This is the most religious of the twelve months, and the ninth day of that month is held in great respect and sanctity. On this day the Fire temples are very much crowded, and offerings of sandalwood are made to the sacred flame, and money distributed among the priests.

Besides the above, the Festivals of the Parsis are the Meher Jasan, the Boman Jasan, and a few others of less importance, all of which are partially observed.

The MOOKTADS is the name of a ceremony which is performed at the end of the Parsi year. It consists of a pile of brass or silver vessels filled with water and raised above the ground on iron stools. Flowers and fruits are placed there, and religious ceremonies in honor of the dead are performed before the Mooktads. A society for religious reform, which has been lately established among the Parsis, has denounced this ceremony in no respectful terms. According to the tracts published by these reformers, the Parsi Scriptures only require that the last ten days of the year should be spent in deeds of charity, prayers, and freedom from worldly pursuits; they add further, that the ceremony of the brass and silver vessels, &c. is borrowed entirely from the Hindus.

The distances in the "fair season" are entirely by land, or partly by land and partly by water whichever is the most expeditious. Both by sea and river the passage is estimated by "country boat," and the month in which the longest passages occur has been taken as the standard for the average length of passage.

The "fair season," as regards sea or river passage from, to, and in Scinde, is estimated to commence on the 15th October and end on the 15th of April.

The "fair season," as regards all other water passages, lasts from the 15th of October to the 15th of May.

When the distance is entirely by land, ten miles per diem is allowed, without halts, by the nearest marching route—*G. O. 31st May* 1855.

RULES FOR THE TRANSMISSION OF MESSAGES BY THE ELECTRIC TELEGRAPH.

[PASSED BY THE GOVERNOR GENERAL OF INDIA IN COUNCIL ON THE 5TH JANUARY 1855, AND MODIFIED BY THE HON'BLE THE PRESIDENT IN COUNCIL ON 4TH MAY 1855.]

I. Messages on the Public Service shall take precedence of all others.

II. Service Messages shall be charged for at the same rate as private Messages, but the former shall be paid for by a transfer in account, covered by a *pro forma* without cash payments.

III. A Return shall be made every quarter to the Government of India and to the local Governments, showing the number and cost of the Messages transmitted by each Department during the preceding quarter.

IV. No Government officer shall employ the Telegraph except on urgent and important occasions, and no Message shall be sent on Service by the Electric Telegraph unless the saving of time effected by the Telegraph is of real importance.

V. At the seats of the local Governments authority to despatch Messages is vested in the head of the Government and in his private Secretary. All other service Messages, Civil and Military, shall be sent under the authority only of the Chief Secretary to Government and of the Chief Military Officer respectively.

VI. At Calcutta, Messages will be sent under the signature of the Governor General, of his Private Secretary, and of the Secretaries to Government. The power of communication along the river is also vested in the Superintendent of Marine and the Master Attendant.

VII. At Telegraph Stations not being seats of Government, no Service Message shall be sent unless it be signed by the Chief Civil or Military Officer of the Station, each for his own Department.

VIII. The Officer who signs the Message will be responsible for the necessity of sending it by the Telegraph, and if on the periodical inspection of the Station-books it shall be discovered that Messages of a trifling nature have been despatched, the Officer who authorised them will be made to pay for them.

IX. Officers, whose signatures will authorise Messages to be sent free, are bound in honor not to send private communications under cover of that authority.

* Already opened.

X. All Service Messages must be conveyed in as few and as short words as possible.

XI. Messages will be received for transmission by Electric Telegraph at the undermentioned rates of charge, and subject to the following rules:—

Messages of 16 words and under, including the name of the sender, the name of the person addressed, the date (if inserted), and the names of the places of despatch and destination (unless they be also the names of Telegraph Stations), will be sent a single distance along the line for one rupee.

Messages as above, exceeding 16 words, but not exceeding 24 words, will be sent a single distance along the line for one rupee and eight annas.

Messages, as above, exceeding 24 words, but not exceeding 32 words, will be sent a single distance along the line for two rupees.

And for every additional 16 words, or fraction thereof above 32 words there shall be charged, for a single distance, an additional rupee.

A single distance is commonly any distance not exceeding 400 miles; and for every additional single distance above 400 miles there will be made an additional charge equal to the charge made on the same Message for a single distance.

No charge is made for stops, or for prepositions, or such words as "and Co.," "Mr." and "Mrs." occurrring in the address of a Message.

The name of the sender, of the person addressed, and of the place of address, must be written on the face of every Message.

The date may be written or not, at the option of the sender.

A single distance from Calcutta will include Benares, Mirzapore, and all intermediate Stations.

A double rate from Calcutta will include Agra and the intermediate Stations at Allahabad and Cawnpore.

A treble rate from Calcutta will include Meerut, Delhi, Loodianah, Lahore, Gwalior, Seepree, and Indore.

A quadruple rate from Calcutta will include Peshawur and Bombay, Six rates including Madras.

Peon hire, at the rate of 4 annas per mile, will be charged for extra, if the Message be sent to any place at a distance beyond half a mile from a Telegraph Station.

XII. No Message, however brief, will be charged for at less than a single rate, and the reply will in every case be charged for separately.

XIII. Mercantile or other Messages involving important results, will only be received on condition of being repeated back from each receiving Station, and half price will be charged for repetition, according to the practice in Europe.

XIV. The sender of a Message may pre-pay the charge for a reply, which must be limited to the number of words so pre-paid for.

XV. All Messages must be in the English language, and must be pre-paid in cash, including Peon hire, excepting Messages sent from River Stations below Calcutta.

XVI. No unpaid Message, with the above exception, shall on any account be transmitted. A violation of this rule will subject the Signaller or Assistant in charge of the Station whence the Message may be sent, to dismissal from office.

XVII. Messages in cypher will be charged for at triple rates, under special rules which may be learned at the different Telegraph Offices.

XVIII. All communications in cypher must also be repeated back to obtain accuracy, and the repetition will be charged for in addition, at single rate.

XIX. Should a Message in cypher be tendered for transmission simultaneously with a Message in ordinary language, the latter will take precedence of the former.

XX. Subscriptions for daily Messages of 48 words or more, will be received at an abatement of one-fourth of the above-named rates.

XXI. Violation of Secrecy on the part of any Officer, Assistant, Clerk, or Signaller in the Telegraph Department, will be punished by dismissal from office, forfeiture of arrears of pay, and a declaration in the official *Gazette* of the incapability of the delinquent to serve the Government in any public capacity.

XXII. Officers in charge of Telegraph Stations may refuse to transmit a Message which may be of a decidedly objectionable character. Should the character of the Message be disputed the matter may be referred to a Secretary to Government, if the dispute occur at the seat of a Government, or to the Chief Civil Officer if it occur at a Mofussil Station.

XXIII. Private Messages shall be transmitted in the order of their receipt in the Telegraph Office. Should two or more Messages be tendered for transmission at the same time, the shortest shall have the precedence, without reference to its relative importance.

XXIV. No Message or Messages, beyond 200 words in all, can be sent at one time by one individual or firm; and no second Message can be sent by the individual or firm till after the lapse of three hours, unless the line be free and not required by any one else.

XXV. Private Messages will, until otherwise notified, only be received between sunrise and sunset.

XXVI. During the receipt of Messages signalled as "Confidential," visitors shall be excluded from the Signalling Room. A violation of this rule shall subject the Assistant in charge to dismissal from office.

XXVII. News and Messages shall be conveyed in the following order :—

1*st.*—Intelligence of the English Mails.
2*nd.*—Messages for the Press.
3*rd.*—Messages for Subscribers.
4*th.*—Messages for Non-Subscribers.

XXVIII. Overland intelligence, or other public news of great importance, shall be given to the Press free of charge, at the seats of the different Governments, and at all other places on the line where Newspapers are published, and where there are regular repeating Stations. The intelligence or news will ordinarily be given in two Messages; the first in as few syllables as possible, and containing not more than 25 or 30 words, the second Message will be full, but shall not exceed 640 words.

XXIX. Messages will, under these rules, be received by Post from Europe or elsewhere for transmission, if money be deposited beforehand sufficient to pay for the transmission.

XXX. Messages will also be sent to the Post Office in letters, bearing postage, when intructions to that effect are sent with the Message.

XXXI. The accuracy of Messages is not guaranteed.

XXXII. The foregoing Rules are provisional, and the rates are open to revision.

DESPATCH OF MESSAGES BY POST AND TELEGRAPH, FROM PLACES NOT HAVING TELEGRAPH STATIONS.

All Post Masters will be provided with copies of the preceding rules and a table of distances, showing the rates to be charged for a Message of 16 words between any two places on the lines.

Thus, the distance between Meerut and Calcutta is marked in the table as 3, which means that a Message of 16 paid words is charged at 3 rupees —a Message of 17 to 24 words Rs. 4-8—a Message from 33 to 48 words

Rs. 9—the charge for any given number of words being multiplied by the *number* in the table, and half added in case of *repetition*. Thus a repeated Message of 32 words between Meerut and Bombay will be charged—32 words at a single rate Rs. 2 ; sent 3 distances Rs. 6 ; add one-half for repetition—total, Rs. 9.

The Post Masters will explain the rules and rates to applicants, and inform them of the nearest Telegraph Stations from which there Message can be despatched.

The Message is then to be written on a stamp of the required value, according to the subjoined form, in which the numbered words are those charged for ; the words not numbered are passed free.

The stamps are procurable from all civil treasuries, and from the regular licensed vendors.

The Message must be written on the stamped paper, and if two stamps are required the Message must be written across both.

The stamped Messages are then to be sent by post under envelopes, marked conspicuously "ELECTRIC TELEGRAPH DESPATCH ;" all such despatches will have priority of delivery at the receiving Post Office to Telegraph Messengers, who will be kept always in attendance.

It is strongly advised that such Messages be sent as *Registered* letters ; a copy of the Message should also be sent by post to the party, addressed in the usual manner.

The sender of a Message must accept all risk of delay, non-delivery, or error. No refund will be made of fees.

Complaints regarding missing or inaccurate messages will receive immediate attention, and all cases of neglect on the part of the Assistant be severely punished.

In the address of a Message the names of the places are not charged if there be Telegraph Stations at such places ; but names of places having no Telegraph Stations—of quarters, streets, or houses, and all such special directions, will be charged word for word.

In the *address* of a Message the words Mr.—Mrs.—Miss—Messrs.—and Co.—From—For—To—are passed free ; but all these words in the body of the Message are charged for.

Dates are optional, and may be given without name of the month, as "Wednesday" or "23rd" &c. &c.

Numbers are in all cases charged for word by word, as if written in full—thus 1855, are *five* words.

The name of the sender of a Message must be given in all cases, and be written on the face of the Message.

In names, each initial is counted as a word, and it is strongly advised that the Christian names be spelt in full.

No charge is made for the stop ; notes of interrogation, admiration, and inverted commas are not transmitted.

Senders of Messages are advised to use the shortest and most familiar words they can select. The more intelligible a Message is, the greater is the certainty of its being transmitted free of error.

Senders are also *advised* to specify the streets and numbers of the residences of the persons they address, specially with reference to Calcutta, Bombay and Madras. The Telegraph Offices have necessarily but small delivering establishments, and many Messages sent merely to "Calcutta," "Bombay," or "Madras," miscarry through this omission.

Messages which must be *repeated* include all those sent on mercantile, banking, and money business of every kind ; on law matters, freights, shipping, insurances, and markets. *Repetition* is also *recommended* for family Messages of special urgency.

The above Message has 24 words paid for, or 1½ rates. Charge for words, Rs. 1-8-0; for distance from Agra to Calcutta, 2 distances—total charge, Rs. 3.

The Message is given in illustration of the practice when special streets are named and dates given.

REGISTER OF CORRESPONDENTS' NAMES.

Several Messages having miscarried through errors in spelling the names of the parties addressed, a Register has been opened in the Calcutta, Bombay, and Madras Offices, in which persons may insert the names of one to four habitual Correspondents at other Stations. This list is printed, and a copy supplied to each Station. The words "to Registered Correspondent" will be telegraphed in all such cases free of charge.

As more than half the Messages on the lines pass between such habitual Correspondents, it is confidently expected that the mistakes referred to will be thus prevented in a proportionate degree.

No charge is made for the Registry; and one or more names may be added monthly. The Register will be printed and circulated on the first Saturday in each month.

TELEGRAPHIC CORRESPONDENCE WITH PLACES OFF THE LINE.

Under orders of Government, Messages are received for transmission at any Telegraph Office if sent by Post from places not having Telegraph Stations, if written on ordinary stamped paper of the value required.

It is recommended that all letters containing Messages for despatch by Telegraph be registered at the Post Office, and be marked with the words "*Telegraph Message*" in large letters and in red ink.

11. The weight of baggage to be carried by the Railway Company free of charge is to be 2 tons or 54 maunds 18 seers (Indian maunds of 82⅞ lbs. each) per hundred persons, and is exclusive of arms for Officers, and of the muskets in case of Troops.

12. All baggage in excess of 2 tons or 54½ maunds per hundred persons is to be paid for separately by the Government, provided the weight does not exceed the scale noted below :—

13. As regards the transactions with the Railway Company, there is no distinction of rank recognised. They have to carry for every hundred persons conveyed, be the rank what it may, 2 tons or 54 maunds 18 seers of baggage, exclusive of the side-arms of Officers and of the muskets of Soldiers.

14. This would give, if equally divided, an allowance of 21·78 seers of baggage to each individual, exclusive of arms.

15. With the allotment of the quantity specified in paragraph 12 amongst the individuals forming the Detachment, the Railway Company have no concern, but the table there given shows the quantity which is allowable by Government to the several ranks without charge.

16. In the case, therefore, of individual Officers, or of Detachments of Troops moving with several Officers, the quantity of baggage allowed by Government will necessarily exceed the aggregate of 2 tons or 54½ maunds per one hundred persons, and for such excess Government will have to pay the Railway Company.

17. The extra baggage thus chargeable to Government will be certified by the Quartermaster General's Department, under which certificate and audit by the proper Department the Railway Company will draw the amount due for its conveyance; all baggage in excess thereof will be settled for by the Senior Officer of the Troops by payment on the spot.

18. Before Troops proceed by Railway, Officers Commanding Regiments or Detachments are to have the baggage paraded and weighed by Companies, and each Officer commanding a Company is to report to the Commanding Officer the amount for which he requires carriage for payment, in order that those who do not take more than the regulated quantity may not pay for those who do.

19. The Ordnance or Barrack Department at Bombay or Poona (and hereafter at any Cantonment on a Railway Line) will issue on loan to any body of Troops under orders to proceed by Rail such number of Steelyards or other weighing apparatus as may be required for the purpose of ascertaining the weight of baggage of each individual before proceeding to the Station.

20. The Regimental operation of weighing is to be carried out in presence of the Troop or Company Officers, who are to be held responsible that the correct amount of excess weight is put down against each man's name by the respective Company Orderlies; the total amount of excess beyond the Government allowance according to the Railway Traffic Ma-

nager's calculation being paid for at the Station by the Commanding Officer without delay, and adjusted afterwards.

21. The weighing at the Railway Station will then, with the exception of the baggage of the European Officers (which must always be weighed and paid for separately), and of public Stores, take place in gross, and will consequently be effected rapidly.

22. Regimental or public property of every description, the cost for the conveyance of which is to be charged to Government, must be weighed separate from that of individuals.

23. When it may be necessary to send stores by Railway, the requisition must be made out by the Officers of the Department concerned at the Station whence they are sent, who must furnish Returns showing the number of packages, the weight, and other necessary details. These Returns must be contersigned by the Heads of Departments, or, in cases of emergency, by Officers Commanding Stations.

24. Mounted Officers proceeding with Troops will be entitled to have their chargers, with equipments and attendants, conveyed at the expense of Government.

25. In sending Troops to Bombay, when the number does not exceed one hundred men, and they are required to proceed by regular Train, one hour's notice is to suffice ; if the number exceed one hundred, or they proceed by Special Train, not less than twenty-four hours' notice to be given, stating the number of men and quantity of baggage to be conveyed.

26. In sending Troops from Bombay not less than twelve hours' notice is to be given, with the same particulars as regards any body of men above one hundred, or one hour's notice as regards any body less than one hundred.

27. When any body of Troops proceeding by Railway exceeds one hundred in number, it is to be at the Railway Station one hour before the departure of the Train ; when below that number half an hour. This number to include Troops, women, and followers.

28. Individual Soldiers, or small Detachments under charge of Non-Commissioned Officers, are to be considered in every respect as 2nd class passengers, and are to be entitled to have carried for them free the quantity of baggage laid down in paragraph 12, exclusive of their arms as Soldiers. The Railway allowance for a Soldier travelling on duty singly is the same as to an ordinary 2nd class passenger, namely 19 seers, and not at the rate of maunds 54 17·77 per one hundred men.

29. In like manner, individual Commissioned Officers are to be held entitled to the privilege of 1st class passengers, and allowed to carry 49 seers of baggage free, the difference between that quantity and the allowance of their rank, as shown in paragraph 12, being paid for by Government on the production of a proper certificate, and the charge being audited.

30. Individual Officers or men proceeding on duty by Rail will not be entitled to the privileges of travelling at reduced fares, and having any portion of their baggage conveyed at the public charge, unless it is certified by the proper authorities that they are proceeding on duty.

31. Boat allowance to and from Panwell to Officers proceeding on duty to and from the Deccan is discontinued from the 18th October 1856. In lieu thereof a Railway ticket to or from Campoolee will be granted on application to the Quartermaster General's Department, for the Officer, servants and baggage, as prescribed by the Regulations ; and in the case of Staff Officers, a ticket for one or two chargers will be granted, subject to the rules now in force as to the number for which passage money to Panwell would have been allowed.

32. When Treasure is ordered to be sent to Bombay by Railway, the

Officer Commanding at the Station whence it is despatched will report, to the Brigadier Commanding the Garrison of Bombay, the intended day and hour of despatch, and the number of packages, in time to admit of the Brigadier ordering a sufficient Guard to the Railway Station at Bombay to receive and escort it to the General Treasury, and the Officer Commanding at the Station whence it is despatched will send such Escort with it from the Treasury to the Railway as he may consider necessary.

33. The boxes of Treasure, when deposited in the carriage and compartment allotted by the Railway Company (and into which no parcels of Goods save the Treasure, and no persons whatever but the Escort and Railway Company's Guard, are to have access) are to be made over by the Officer Commanding the Escort to a Non-Commissioned Officer and four men, who are to accompany it to the Bombay Terminus, where they will be met by a suitable party ordered by the Brigadier Commanding the Garrison, and the united Escorts will see the Treasure conveyed to the General Treasury and duly made over.

34. On occasions of the transport by Railway of Military parties in charge of Convicts, no persons whatever, save the Escort and Railway Company's Guard, are to have access to the carriages in which the Convicts are placed.

Forms of Requisition and of Returns will be arranged from time to time, in communication with the Railway Company, and will be supplied by the Quartermaster General's Department to Officers Commanding Stations on the line of Rail.

Conditions, Regulations, and General Information.

PASSENGERS.

The Rates of Passage Money will be proportionately increased according to the class of accommodation required.

The Rates of Passage Money include Stewards' Fees, Table, Wines, &c., for First-class Passengers. Bedding, Linen, and all requisite Cabin Furniture are provided in the Steamers at the Company's expense, together with the attendance of experienced male and female Servants.

The expense of Transit through Egypt is also included in the Rates of Passage Money to India and China, with the exception of Hotel expenses, and also of Extra Baggage, Wines, Spirits, Bëer, and Soda Water, all of which the Egyptian Transit Administration charge for separately.

Servants soliciting gratuities will be dismissed from the Company's service.

Passengers booked for places beyond Gibraltar desirous of visiting the ports of Spain and Portugal on their way, can do so without any additional expense, on pre-payment of the whole of the Passage Money, by leaving Southampton in the Company's Steamers on the 7th, 17th and 27th of every month, touching at Vigo, off Oporto, at Lisbon, Cadiz, and Gibraltar; and joining, at the last-named port, the Steamer for Malta and Alexandria, touching at Gibraltar. Any or all of the Peninsular ports may therefore be visited by staying ten days or more at each, and proceeding by successive Steamers, previous to joining the main line at Gibraltar.

An opportunity is thus afforded to Passengers of visiting these interesting localities, without an additional expense on account of Passage Money.

Half the amount of Passage Money, when the passage exceeds £20, is required to be paid on securing passage, and the balance a fortnight before embarkation.

Passengers not embarking after engaging passage, to forfeit the deposit of half the amount of Passage Money.

In case, however, of a Passenger being unavoidably prevented from availing himself of a passage at the period for which it is taken, a transfer of the passage can be effected to a subsequent Steamer, on due notice being given, without forfeiture of any portion of the deposit paid, and accommodation will be allotted as similar as circumstances will permit.

In remitting a sum of money to the Company on account of passage, if by Cheque it is recommended, for the sake of security, to write across the Cheque the name of the Company's Bankers, "*Messrs. Williams, Deacon, and Co.*;" if by Order, Letter of Credit, or otherwise, it should be in favour of the "*Peninsular and Oriental Steam Navigation Company.*"

Passengers should embark at Southampton not later than noon on the day of sailing.

Passengers must comply with the regulations established on board the Steamers for general comfort and safety.

BAGGAGE.

The attention of PASSENGERS by the OVERLAND ROUTE to and from India, China, &c., is respectfully requested to the under-noted Regulations in reference to Baggage; much trouble and loss is occasionally caused by their neglect, and the Egyptian Transit Administration will not accept any responsibility unless they are strictly complied with:—

All Baggage should be addressed in Paint, in full, and in addition Passengers will be supplied on Board the Steamers with printed "Destination Labels," which should be affixed to all Packages, however trifling, before arrival at Alexandria or Suez.

The Transit Administration will not forward any Package of Baggage exceeding 80 lbs. in weight, and measuring more than—length 3 ft., breadth 1 ft. 3 in., depth 1 ft. 2 in., with the Passengers to Suez. Non-compliance with this rule will cause a fortnight's detention in Egypt, to such packages as exceed these dimensions.

All Baggage should be packed in Leather Portmanteaux or Trunks of the regulation size, with addresses in full painted on the top and end, and fastened securely with case locks, padlocks and leather straps, being liable to damage or removal. The Transit Administration will not be responsible for the safe conveyance of deal cases, bandboxes, carpet bags, or other unsuitable and insecure Packages.

Packages containing Jewellery, Plate, or other valuables, must be specially booked, and Freight and Transit Duty paid thereon.

Packages containing Parcels, Specie, or Merchandise, are liable to seizure and confiscation in Egypt, and to detention for Freight by the Agents of the Company.

First-class Passengers are allowed 3 *cwt. of personal* Baggage free of Freight and Children (above three years) and Servants 1 ½ cwt. each.

A Passenger taking a whole Cabin will be entitled to take in the Steamers, free of Freight, 4½ cwt.; and a married couple, paying for reserved accommodation, will be entitled to take 9 cwt.

The charge for conveyance of extra Baggage, should there be room in the Vessel, will be at the rate of £1 per cwt. between England and Malta or Alexandria; 2 lbs. per Cwt, between Suez and India, and £3 per cwt. between Suez, the Straits, and China.

Passengers for India and China will have to pay the Egyptian Transit Administration in Egypt 14s. per cwt. for conveyance of Baggage through, should it exceed, for First-class Passengers, 3 cwt. each, and Children and Servants 1½ cwt. each.

The Company cannot engage to take any excess of baggage over the regulated allowance, unless shipped at Southampton on the day before sailing, and Freight paid thereon.

All Baggage for the Ports of the Mediterranean, India and China, must be shipped not later than noon on the day previous to sailing, except Carpet Bags or Hat Boxes. All other Baggage received on board, on the day of sailing, will be considered as extra Baggage, and charged Freight as such.

The Insurance of Baggage can be effected on very moderate terms.

Passengers embarking at Marseilles for India and China, can have 3 cwt. of their Baggage conveyed by the Steamer from Southampton free of charge; all in excess of that weight will be charged for at the rates mentioned above.

Passengers embarking at Marseilles for Malta and Alexandria, can also have 3 cwt, of their Baggage conveyed by the Steamer from Southampton at the rate of 10s. per cwt.; the excess to be paid for at the rate of £1 per cwt.

For the regulated allowance of 3 cwt., 10s. per cwt. for any excess over 3 cwt., 20s. per cwt. } Exclusive of the charge for transport made by the Transit Administration of Egypt.

Passengers not proceeding by the Peninsular and Oriental Company's Steamers, but shipping their Baggage from Southampton, will be charged at the rate of 10s. per cwt. between Southampton and Malta or Alexandria.

N. B.—The Baggage of Passengers proceeding via *Trieste must be shipped at Southampton so as to ensure its arrival at Alexandria a fortnight in advance of the Passengers to whom it may belong, Non-compliance with this regulation is likely to involve loss or detention of the Baggage in Egypt.*

Passengers requiring information respecting their Baggage during the voyage will learn, on application to the Commander, the name of the Officer in charge of same.

Baggage can be occasionally had up from the baggage-room during the passage by application to the Officer in charge.

No Trunks, Boxes, or Portmanteaux allowed in the Saloon or Cabins.

NOTICE.—*All Parties are requested to take notice, that the Company do not hold themselves liable for detention or delay of Passengers arising from accident, or from extraordinary or unavoidable circumstance, or from circumstances arising out of, or connected with, the employment of the Company's vessels in Her Majesty's Mail Service, and that the Company do not hold themselves liable for damage to, or loss or detention of, Passengers' Baggage.*

STEAMERS.—'Indus', 'Chenaub', 'Satellite', 'Planet', 'Nimrod, 'Assyria', 'Napier', and Conqueror.

(There are Agents at KURRACHEE, SUKKUR AND MOOLTAN.)

The Steamers leave Kurrachee about the 24th of each month, or 48 hours after the arrival of the steamer from Bombay; and Mooltan about the 26th.

There are three classes of passengers entitled to mess with the Commander; the first class, who have a comfortable cabin, the second class, who sleep and dress in the saloon, and the third class, who sleep and dress on deck.

The charge for passage from Kurrachee to Mooltan is—

1st class.....	Rs. 200	3rd class.....	Rs. 100
2nd class	Rs. 150		

Deck passengers who provide their own food, Rs. 25.

The passage from Mooltan to Kurrachee is two-thirds the upward rates.

Each cabin passenger is allowed one servant, all others charged for as deck passengers. 1st, 2nd and 3rd class passengers are allowed ½ a ton, or 25 cubi .eet of baggage, children 4 cwt. Deck passengers, a roll of bedding and a box not exceeding 5 cubic feet—children one roll of bedding.

TABLE MONEY.

A public table is provided by the Commander at 4 Rs. per diem for each person, exclusive of wine and beer, which, if provided by the Commander, are charged at regulated prices, of which a list is exhibited in the dining cabin. Children from 6 to 12 years 2 Rs., and under the age of 6, who do not come to the public Table, 1 Rupee per diem. The same charge is made for a Christian servant; Mussulman servants 3 annas per diem; Hindoos provide their own food. Deck passengers, if Europeans, can mess with the warrant officers on paying 2 Rs. per diem, or they can provide their own food.

Ladies, and children under six years of age, must take a cabin passage.

When two ladies occupy one cabin, deck passage for one will be charged in addition to that for the cabin.

Three children occupying a cabin will be allowed one servant free.

The Passage money, and a deposit of Rs. 4 per day for the estimated term of the voyage, must be paid on engaging a passage; and any surplus of Table money will be returned, or an additional charge be made by the Commander, as the voyage may fall short of, or exceed, the time for which the deposit was calculated. Half the passage money and half the Table money become forfeited by persons who relinquish a passage after having engaged it.

Cabins will be allotted to ladies and children in preference to gentlemen.

1st or 2nd class passages engaged in Kurrachee or Mooltan, for however short a distance, will be charged two-thirds of the rate between those two places; but if the chance be taken of a 1st or 2nd class passage being vacant, the charge will only be for the distance it is occupied. Thus a 1st or 2nd class passage being retained in Kurrachee to Hydrabad, in a ves-

sel proceeding to Mooltan, will be charged for 533 miles; but if the chance be taken of one being unengaged, the charge will only be for 230, the estimated distance between Kurrachee and Hydrabad.

SAILING DIRECTIONS

FOR THE

COASTS OF SIND, KUTCH, AND WEST COAST OF KATTYAWAR.

WITH DIRECTIONS FOR MAKING AND ENTERING

KURRACHEE HARBOUR

AT ALL SEASONS, AND FOR LEAVING IT IN THE SOUTH-WEST MONSOON;

WITH THE

PREVAILING WINDS, WEATHER, CURRENTS, &c. OFF THE ABOVE COASTS, FOR EVERY MONTH IN THE YEAR.

FROM THE

OFFICIAL REPORTS AND AUTHORITY OF COMMANDER A. M. GRIEVE, I. N.

DRAWN UP BY ORDERS OF THE BOMBAY GOVERNMENT,

BY

LIEUTENANT E. F. T. FERGUSSON, I. N., F.R.A.S.

General Remarks.

Masters of Ships leaving England, or any other Port, bound for Kurrachee, will do well to bear in mind that, during the months of June, July, and August, and part of September, no ship should arrive off Kurrachee with a greater draft than seventeen feet, as ships more deeply laden than that are apt to bump on crossing the Bar, and do serious injury to themselves.

June, July, and August at Kurrachee are the SW. Monsoon months, when there is often bad weather, and always a troublesome sea. Ships arriving, or expecting to arrive, off Kurrachee during the above months, should not anchor in the Outer Roads, if it can possibly be avoided,* by keeping off and on until the high-water time permits their crossing the Bar.

The depth of water on the tail of the Bar is always signalled to every ship, on arrival, from a small flagstaff on Manora Point, a little to the right of the high flagstaff; and, if practicable, a Pilot is always sent off to pilot ships over the Bar to the anchorage.

Ships arriving off Kurrachee from the middle of September to the end of May may draw as much as nineteen to twenty feet, but not more.

There are two channels over the Bar into the inner Anchorage; the Eastern, or deep-water channel, and the Western, or inner channel: the latter can be used with safety throughout the SW. Monsoon by vessels not drawing more than sixteen feet, the least water in it being ten feet at low-water spring tides.

Vessels from London, or from the westward of Kurrachee, bound to the latter Port, should not care to make the Coast of Sind and Kutch, or any of the contiguous land whatever, previous to sighting Kurrachee Lighthouse; but should they do so, and find they have to beat up to Kurrachee, they will find the entire Coast, with one or two exceptions, which are hereafter specified, a perfectly safe one to approach.

From Diu Head to Kurrachee, the Coast is divided into three parts:

Diu head to Dwarka is the West Coast of Kattyawar.

From Dwarka to Juckoo we have the entrance to the Gulf of Kutch; and any vessel bound to Kurrachee, or even out of Kurrachee (unless bound into the Gulf of Kutch), has no right, on any account whatever, to go inside of a line drawn from Dwarka to Juckoo.

To the southward of the Lukput river, the Coast is within the territory of Kutch, and all to the northward of that river is the Coast of Sind.

As correct Charts of all these coasts have been published, and are now to be had in London, it is not considered necessary to give the latitudes and longitudes of the different Ports on the coast, as it is very seldom they are visited by ships other than the Native craft of the country.

The West Coast of Kattywar runs about NW. and SE., with bold soundings off its entire length, except a small patch of 2 to 3 fathoms a few miles west of Diu Head (vide Chart).

No vessel should approach this Shoal under 12 fathoms, which is about one mile from its southern edge.

The general character of the West Coast of Kattywar is low, with a sandy ridge fronting the sea. There are a few hills visible along the coast. The Barda range lies NE. 12 miles from Porebunder, and may be seen 25 to 30 miles off. Junaghur Hill is in 21° 31′ 48″ N., and 72° 32′ E., of a conical form, 3,837 feet high, with three small peaks on it, and may be seen all along the coast from Diu Head to Porebunder.

As a general rule, no sailing vessel should come nearer this coast than 20 fathoms by night or in rough water; or under 12 fathoms by day in fine weather.

Off the entrance of the Gulf of Kutch is a small patch called the "Lushington Shoal," having only 3 fathoms on it, and during the SW. Monsoon the sea breaks on it. Great care should be taken in approaching this danger.

From above Juckoo, the coast is pretty safe, and may be approached to within 7 fathoms, until you reach the Muneja Bank.

* Many ships have lost their anchors by anchoring in the Outer Roads during the SW. Monsoon.

The Muneja Bank extends 6 to 7 miles off shore, from latitude 23° 55′ N., longitude 67° 27′ E., to latitude 24° 11′ N., longitude 67° 15′ E. It is formed by the alluvial deposits of the river Indus, which, in 1854, was navigated by the Hujamree Channel, but the waters have since forced their way to the southward, through the Kookiwari mouth.

The western edge of the bank is very steep, having 5 fathoms at one mile, 8 at two, and 10 at three miles distance. The flood tide rushes out strong, causing a high ripple, which would very probably be mistaken at night for shoal-water, particularly as the muddy particles give the water a whitish, and sometimes a luminous appearance.

During the inundation the water is frequently fresh at the mouth of the river at half-ebb. The flood-tides are not strong.

The Coast above the Muneja Bank up to Kurrachee is very safe to approach during the fine weather, and vessels may go safely into 5 fathoms by day, and 8 at night; but during the SW. Monsoon months, it would be prudent to avoid getting in too close, partly because there is a set to the SE., and partly because the wind is liable to lull occasionally, and thus a vessel might get into difficulty.

The deep-sea or outer soundings along the entire Coast from Diu Head to Kurrachee are very accurately laid down, and in cloudy, foggy weather, when observations for latitude and longitude are not procurable, a little attention to the soundings will enable the navigator to fix the position of his ship with great nicety. The most remarkable feature in the soundings is the Swatch, in latitude 23° to 23° 45′ N., and longitude 67° to 67° 35′ E.

DESCRIPTION OF THE WINDS AND WEATHER ON THE COASTS OF SIND, KUTCH, AND KATTYWAR. BY COMMANDER GRIEVE, I. N.

January.—Steady land and sea-breezes between NNW. and NNE. The North-Easters on the Coast of Sind and Kutch frequently blow fresh for three or four days at a time; Southerly winds are rare, but the sea-breeze occasionally veers to SW.; squally weather, with rain, sometimes occur near Kurrachee.

February.—Winds become more variable; the North-Easters less frequent, and of short duration; sea-breezes between WSW. and WNW., and towards the end of the month you may get a hard blow from the westward for two and three days, particularly on the northern part of the coast: a heavy sea always accompanies these breezes, and renders the Anchorage off Kurrachee in the Outer Roads very unsafe.

March.—Land Winds become less regular; sea-breezes are generally moderate, between W. and NW., but blow very hard at times, with thick, misty weather.

April.—Winds much the same as last month; weather generally hazy, with a very damp atmosphere; swell from the westward at times.

May.—Winds moderate, W. to WSW.; weather hazy, with very heavy dews; clouds begin to gather, and much swell prevails from the westward.

June, July, and August.—The SW. Monsoon prevails, blowing moderate, and fresh breezes from W. to SW. by W., with passing clouds and hazy weather. It becomes very cloudy as the season advances. Rain is uncertain, but may be looked for in the latter half of July, and when it falls it is generally accompanied by variable winds and thunderstorms. A heavy swell prevails during these months.

September.—Winds light, from W. to WSW.; squalls from the land may be expected; the weather is generally hazy, and the monsoon swell not quite subsided.

October.—Winds W. to NW., light, with occasional calms; land winds begin to get steady about the latter end of the month; weather generally very clear and pleasant, but occasionally dense fogs come off the land; sea smooth.

November.—Land and sea-breezes become steady, veering from W. to NE.; the land winds towards the end of the month often lasting two days at a time, but not very strong; weather generally very clear, and objects visible at a great distance; remarkable terrestrial refraction prevails this month and the next, making distant objects appear much closer.

December.—Winds and weather the same nearly as described for January; North-Easters prevail, and the weather is cool and pleasant, with a remarkably clear atmosphere.

COMMANDER GRIEVE'S REPORT ON THE CURRENTS ALONG THE KATTYWAR COAST.

Of these I have little knowledge, except for short periods during the months of November and December 1853. The current sets always to the NW., from 1 to 1½ knot per hour, but liable to checks, particularly at night, when there was sometimes a drain in the opposite direction. After the middle of January I found no current, but again, from the end of March to the beginning of May, the current frequently set to the SE., at the rate of 12 to 20 miles per day; and there is no doubt that the SE. current prevails along this Coast throughout the whole of the SW. Monsoon, many navigators having experienced it as strong as 30 and 36 miles per day, all along the Coast from Kurrachee to Bombay.

DIRECTIONS FOR MAKING KURRACHEE HARBOUR IN ALL SEASONS, AND FOR LEAVING IT IN THE S.W. MONSOON.

In the fair season, if coasting it up from the southward, after passing the Muneja Bank in 10 to 12 fathoms, the Coast may be approached anywhere to five fathoms, and good anchorage is always procurable. Manora Point will generally be seen from 15 to 16 miles off, and you may steer for it on any course between E. and N. by W.; anchorage off the Port (in fine weather only), with the Lighthouse NE. to NNW., in soundings from seven to five fathoms, sand and mud.

[N. B.—It is not safe to anchor in the Outer Roads, off Manora Point, whenever there is a westerly wind blowing, or expected.]

During the SW. Monsoon, sailing vessels should make Ras Muari (Cape Monze), which is 18 miles W. ½ N. from Manora Lighthouse, and keep to windward of the Port if the weather is thick, or if the tide does not suit for crossing Kurrachee Bar. Allowance must also be made for a strong set to the SE., which prevails more or less throughout the SW. Monsoon. Do not bring Manora Point to the southward of east, or go under 15 fathoms near Ras Muari.

Near Manora Point a vessel may stand in to 10 fathoms. Vessels should not anchor off Kurrachee if it can possibly be avoided, as in many cases vessels have lost their anchors; but should it be actually necessary to anchor, the best anchorage is with the Lighthouse NE. by N. to NE. by E., one to one and a half miles off, in seven or eight fathoms, sand and mud, and care should be taken to veer to a good long scope of cable at once.

Manora Light is "fixed," and may be seen 15 to 17 miles off in clear weather. Off the entrance of the Harbour. the flood-tide sets to the westward, and ebb to the eastward, about three-quarters of a mile per hour. High-water at the full and change of the moon 10h. 30m., rise and fall nine and a half feet.

If leaving Kurrachee in the SW. Monsoon, a sailing vessel, as soon as she is clear of the Bar, should work off to the WSW. into above 15 fathoms, or 10 miles from the Lighthouse., before shaping a course to the southward. For although a vessel might lay along shore from the mouth of the harbour, yet the probabilities are, that the current which sets to the S. E. would set the vessel in-shore towards the mouths of the Indus, and she might get into inextricable difficulties; for it often happens that close in-shore the wind lulls to such an extent that no vessel could beat off with it. In passing the Muneja Bank, she should not be in less than 20 fathoms, or about two miles east of the meridian of Manora. If bound to Bombay, it is well to know that a line from Diu Head to Bombay Lighthouse is the 20 fathom line: so that a vessel by her lead and soundings alone could make Bombay from the northward, by simply keeping in the 20 fathom line.

TO ENTER KURRACHEE HARBOUR.

The Lighthouse at Kurrachee is in—

Latitude	-	-	24°	47′	21″	N.
Longitude	-	-	66	58	14	E.

} Var. 0°55′ E.

On arrival of ships off Kurrachee, the water on the tail of the Bar is signalled from a small staff to the right of the high flagstaff on Manora Point: this may be reckoned as the least water in the fair channel leading to the inner anchorage. It is high water on the Bar at full and change of the moon at 10h. 30m. and the rise and fall of the tide is nine and a half feet. The Light at Kurrachee is "fixed;" it is 119 feet above the level of the sea. and may be seen 15 to 16 miles off.

No attempt should be made by strangers to cross the Bar at night; only steamers do it with old practised hands.

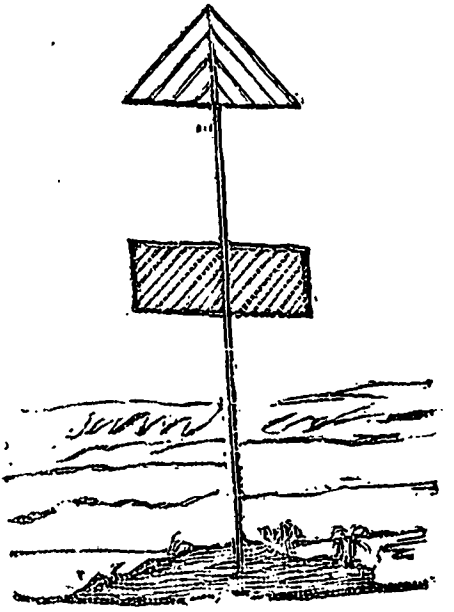
If the weather permits, a Pilot usually comes off to take the ship in, but in case one does not, the following directions will, if attended to, enable the Master of any ship to take his vessel in himself.

For the "Eastern Channel," steer up with the Middle Island and Church in one, or bearing NNE. ½ E., till the little staff on which the Bar soundings are signalled is in one with the high flagstaff; then haul up north, passing between the two red Buoys* off the tail of the Bar, till you get the Old Beacon on with the right side of the Coal Shed, which will lead clear up channel in not less than 14 feet, low-water spring tides.

---

* N.B.—The Large Red Buoy off the tail of the Bar is in the fair channel; the Small Red Buoy, with a staff on the top, marks a nine foot patch, at the extreme tail of the Bar—so do not come too close to it.

The "Western," or inner channel, which is not used by large ships, runs over the Bar in a NNE. direction, a few hundred yards from the cliffs of Manora Point and in all weathers is a very safe channel; and it makes a short cut to the Anchorage compared with the Eastern Channel. The least water in the inner channel at low-water spring tides is 10 feet. The channel as yet has not been buoyed, but the following are safe marks for using it:—Bring the Triangular Beacon (which is a mast fifty feet high, with a triangular grating on the top of it), on the eastern end of Keeamari



Island, on with centre of Jacob's Rifle-butt (a dead wall one hundred feet long and sixty feet high, on Scandal Point); and any vessel with these marks on will go clear over the Bar by the "Western" or inner channel. It must be borne in mind that, in crossing the Bar, it is advisable to keep two hand-leads constantly going, and as soon as you get a deep cast on the other side of the Bar, you must have everything in readiness, and haul the vessel up for "Deep Water Point" at once.

Sailing vessels having to cross the Bar should have all their gear clear, and ropes coiled down clear for running, as the quick working of a vessel will often save her from running aground.

"Deep Water Point" is the first sanday point on the left, at the slope of the cliffs, and is easily distinguishable by a small Battery which is erected on it, to command the entrance of the Harbour. The small Beacon near it, marked "Stump Beacon" on the Chart, is now called Battery Beacon. Off "Deep Water Point" the depths are 6 to 9 fathoms, with rocky ground in some parts.

When once fairly into the Inner Harbour, that is to say clear over the Bar, whether by the Eastern or the Western Channel, vessels should make for "Deep Water Point" after which the anchorage can be selected at discretion, aided by a look at the Chart.

The flood-tide between the Inner and Outer Buoys (of the Bar) sets across the channel to the NNE. and the ebb to the SSW., for which due allowance should be made in crossing the Bar.

To reach the extreme end of the Harbour, there are two buoyed Channels, east and west, round a large sandbank dry at low-water spring tides, called the Middle Ground. If bound up to Keamari Point, the Western Channel is generally used. Both the lower Buoys may be passed at a distance of 150 yards, and the upper one at about 250 yards, and then haul across NE. for Keeamari. The depths in the channel are from 24 to 17 feet, but hauling across to Keeamari as little as 11 feet. The soundings off Keeamari Point are 3 to 3½ fathoms, and 4 fathoms close to the jetty. The Eastern Channel to Keeamari is considered by some to be the best, there being an average depth of 13 to 15 feet all the way up. After passing Deep Water Point, keep to the eastward of the Mooring Buoy (red). with the upper Black Buoy just open off Baba North Point. When at the tail of the Middle Ground, you will have Battery Beacon between Manora Flagstaff and Lighthouse ; then stand upon that line, hauling a little to the northward when abreast the Upper Buoy, so as to bring the Beacon to the right of the Lighthouse, and anchor in any convenient position.

The general strength of the spring-tides within the Harbour is about 2 miles per hour ; on the neaps about ¾ mile, and sometimes scarcely perceptible. The tides set fair up and down the channels and creeks, except, as noted, at the Bar, Buoys, and Keeamari Spit. Over the Flat to the eastward they are very weak at all times.

Several Charts of Kurrachee Harbour have been published from time to time, as the alteration of the Bar seemed to necessitate : for instance, there is an old one by Carless, but now gone out of date ; there is another, a skeleton one, just showing the Bar, by Campbell ; but the latest is on a very large scale, in two sheets, by Lieutenant Grieve, I. N. ; but even since this was published, the Bar has been found to alter, and luckily, as heretofore, much to its improvement, as the length of the Bar appears to be shortened, and the Inner Channel to have washed deeper ; but all above the Bar remains as before, and a more precise or beautiful Survey of it could not be desired.

Measurement by Callipers

Of Cotton, Wool, Hemp, and other Screwed and Pressed Bales, at this Port.

RULES.

I. That Callipers shall from time to time be submitted to the Secretary of the Chamber of Commerce, and, if found correct, shall be branded with a Stamp bearing the name of the Chamber, to indicate the same.

II. That if, from use or otherwise, any Callipers should get out of order and be objected to, the party objecting shall send the Callipers to the Chamber for examination; and should the objection be valid, the Chamber Stamp shall be defaced by the Secretary; if, however, the objection is found to be groundless, the Secretary shall give a note to that effect, and the party objecting shall be bound by his decision.

III. That any Callipers found incorrect, and on which the Stamp has been defaced, may be re-stamped after adjustment,

IV. That no measurements shall be held good, except such as are taken by Callipers bearing the Chamber's Stamp.

V. That Cotton, Hemp. Wool, and other screwed Bales, shall be measured as follows, namely: the greatest length to be first ascertained, and then the Bale to be set on either end, as the Shipmaster may wish, and cross measurements to be taken at top over the lashings, excepting the knots, and as near the centre of the bale as possible. That an average of 100 Bales be struck by ascertaining the actual measurement of any 10 Bales, and proportionately, the Shipper selecting and measuring one half, and the Shipmaster the other half; should, however, any dispute or difficulty arise in the selection of Bales, either party to have the option of measuring the whole quantity.

VI. That all produce subject to measurement be measured within the day on which it has been ordered to be screwed, provided the order has been given by the Shipmaster or Agents of the Vessel; and that from 1st June to 15th October the same be measured at the Screws; during the remainder of the year, if required, on the Bunder, weather permitting. No Cotton, Wool, or other goods, to be measured, until a Custom House Pass has been obtained for the same.

VII. That, in the event of the Shipmaster not attending to measure at such hour as may have been appointed by him, the Agent or Agents of the Ship do empower a person to attend on his behalf, whose sanction to the measurement shall be binding upon the Shipmaster.

Great irregularity appearing to prevail in the arrangements of the departure of Native Boats from the Harbour of Bombay, the following Rules are to be hereafter enforced.

I.—All Arab boats arriving in Bombay, not using a Pilot, shall report their arrival at the Police Office, when the names of the crew and passengers, and any extraordinary occurrence which may have happened will be taken down in writing, by the Deputy Superintendent of the Water Division, and a report made to the Senior Magistrate of Police.

II.—Two days previous to the departure of the Vessel, the Nacodah or Tindal shall report to the Police Office any casualty or other particular circumstance which may have occurred on board the Vessel while it has been in the harbour, together with the names of all passengers proceeding in her; this information is, if necessary, to be verified by a search under the orders of the Deputy Superintendent of the Water Division.

III.—A certificate that this has been duly performed will be given by the Deputy Superintendent of the Water Division, and without which, the certificate from the Senior Magistrate of Police will be withheld.

IV.—All boats shall, one day previous to their departure, anchor as near as possible to the Police Hulk, in order that they may be overhauled, and their crews mustered before leaving the port.

V.—In reference to the embarkation of Pilgrims, the following rules will be in future observed:—

VI.—When application for a clearance is made by the Nacodah of the vessel, he will deliver in a list of the intended Pilgrim passengers; an Officer of the Water Division will then proceed on board and inspect the vessel, compare the list with the Pilgrims on board, and certify before the Senior Magistrate the state of the vessel, the correctness of the list, &c.

VII.—Until this is done, no certificate will be granted.

VIII.—The officer who proceeds on this duty of inspection, should inspect personally the place alloted to each Pilgrim in the vessel, and to each Pilgrim should be allowed a space of five feet in length, and two and a half feet in breadth.

IX.—If the number of Pilgrims be reported by the inspecting officer as too great, steps should be taken to ensure the removal of the extra portion to some other vessel.

X.—Vessels should not be allowed to sail, leaving any of their Pilgrim passengers on shore.

XI.—The freight and passage money should also be ascertained and noted down to prevent imposition, and the food and water provided for the Pilgrims on board should form a subject of proper enquiry to the inspecting officer.

GRADATION LIST

OF THE

HON'BLE EAST INDIA COMPANY'S COVENANTED CIVIL SERVANTS

ON THEIR BOMBAY ESTABLISHMENT,

As the same stood on the 1857.

The Rank of Civil Servants commences from the date of arrival at Bombay of the first Writer appointed in Europe, of the same season of which they are Writers; and, being thus determined, all Civil Servants belong, during the first four years, to Class VI.;—from the fifth to the end of the eighth year, to Class V.;—from the ninth to the end of the twelfth year, to Class IV.;—from the thirteenth to the end of the twentieth year, to Class III.;—from the twenty-first to the end of the thirty-fifth year, to Class II.;—and from and after the thirty-fifth year, to Class I.

The date of commencement of service is that of the Covenant, or of the appointment by the Court of Directors, whichever may be the earlier. This is denoted by the letters c or a in the fourth column.

The letters **A, C, G, H, M, P, S,** *and* (*p*), (1), *or* (2) *prefixed to the names, signify that the parties have passed an examination in the Arabic, Canarese, Guzerathee, Hindoostanee, Murathee, Persian, and Sindee Languages, and the "preliminary," "first" or "second" Examination under the Provisional Rules published on the 14th Sept.* 1854.
